Just a few of the reasons we're known as the

No 1 modern* university in London

Top 100 universities in the UK for overall quality of our research

The Guardian University Guide 2024

No.32 university in the UK

UWL ranked 1st in London**, 3rd in England** and 4th in the UK**

Top 20 universities in the UK for sustainability including carbon reduction and food sustainability

Campus investment

Over the past decade we have invested continuously and significantly to create a stunning campus ensuring you have the best social and learning spaces in which you can develop and thrive.

Surrounded by brilliant businesses

Our Ealing campus is in the heart of one of the UK's most successful business regions. Through working with high-profile organisations and experienced tutors, we use our strong industry connections to help you gain career-specific insight, expertise and skills.

UWL is going green

Setting it self as a leader in the sector, the University of West London is committed to protecting the environment and continually improving our environmental performance. We are working hard to embed a culture of sustainability across our University and become a net zero carbon campus by 2030.

A blend of highly respected Schools

Our expertise covers a wide range of subjects, so you can gain the specialist know-how that gives you the edge in your chosen career.

Industry-standard facilities

From our industry-standard hospital simulation centres to our Boeing 737 flight simulator, the study facilities at the University of West London reflect our passion for delivering a first class educational experience and developing students with industry-ready skills. Whatever your discipline you will work and study in modern, excellently equipped facilities.

1860

The Lady Byron School is founded, later known as Ealing Technical College and School of Art from 1928. This became the Ealing College of Higher Education from 1975.

1991

The College merged with the Thames Valley College of Higher Education, London College of Music and Queen Charlotte's College of Health Care Studies to form the Polytechnic of West London.

1992

The Polytechnic becomes the Thames Valley University after being granted university status by royal assent.

1994

The University merges with Northwick Park School of Nursing, Riverside College of Nursing and the North West Thames Regional Health Authority's AIDS unit.

1995

The University merges with Berkshire College of Nursing and Midwifery.

2004

The University merges with Reading College and Ealing School of Art and Design.

20/0

In July, the University closes its site in King's Road, Reading (now home to Reading College).

20//

In April, we are formally renamed the University of West London to reflect our new focus on the Ealing and Brentford sites. In May, Laurence Geller (a leading figure in the tourism and hospitality industry) is appointed Chancellor.

2015

The Ealing campus undergoes a £100m+ transformation. Now it has a new social area, library, students' union, auditorium, gym, restaurants and cafés, music studios and student radio station, and teaching spaces.

20/6

We buy the Brentford site (Paragon) giving us flexibility to grow and thrive.

2017

We invest over £1m in the development of the Paragon Annex studios and open a nursing Simulation Centre at Reading.

2018

Opening of the West London Food Innovation Lab and home to Heathrow Archives and exhibition and Westmont Enterprise Hub for Business Start-Ups.

2019

Opening of Rami Ranger House and the new sports centre. Drama Studio London becomes part of the UWL Group.

2020

Opening of the School of Biomedical Sciences which offers teaching in nutrition, pharmaceuticals or a related industry. Achieved Eco Campus Platinum (ISO14001).

2021

We successfully bid for over £5m of government funding to help improve the environmental sustainability of our operations. Ruskin College became part of the UWL group.

2022

We are in the top 100 universities in the UK for overall quality of our research.

2023

We signed a memorandum of understanding with the Business College of Athens (BCA) to form the Hellenic Institute of Maritime Studies (HIMS), based at our Ealing Campus.

Studying at UWL is all about gaining the skills, expertise and insight you need to excel in your chosen career. You will be taught by highly experienced industry experts and have the chance to benefit from our close industry connections.

The

hey-my-future-employers;

university

So how exactly do we help you towards your career?

Many of our tutors have industry experience

Many of our tutors have first-hand experience of working in the industry you have your sights set on. They also have invaluable insights on where to start in your career and how to stand out.

Business connections and neighbours

The beauty of having close ties with industry is that we know great employers – businesses that will offer you amazing work placements and even your first career opportunity. We are partners with big names like the BBC, Hewlett-Packard, Middlesex Law Society and the Savoy Education Trust. We are also in the heart of one of the UK's most successful business hubs. So think of the opportunities to gain in terms of industry knowledge and insight, not to mention vocational, employability and life skills.

We will help you stand out in the job market

Today's employers actively look for creative, enterprising, critical and globally aware professionals. Our teaching will help you become just that – and give you an edge over the competition. You are investing in your future when you choose a university, and we take that seriously.

university

Choose from a range of career-focused courses

To be career-ready when you graduate, you need a course that takes you beyond the classroom, right into the real world of work. Ours are built around the specific requirements of your chosen path and focus on developing the qualities, skills and expertise your future employer is looking for.

A unique approach to learning

Think of a degree here as a career foundation course that will give you the grounding you need for your future.

Our teaching is tailored to your individual needs, while our open, accessible learning environment will see you thrive. It has resulted in an amazingly high graduate employment rate. Here's how it works:

Personal tutor

You will have your own personal tutor from day one. They will take an active interest in your academic progress and university experience. They will also help you find the appropriate academic, welfare and support services when necessary.

Mentoring

If you need non-academic help, our mentors are on hand. You can either drop into a one-to-one session during the week, or ask to be paired with a peer mentor who can help you find your way around university life.

Careers

It is all very well developing impressive skills, expertise and experience. But how do you get that message across to future employers? Our expert careers consultants will

- Support in exploring and developing your career plan
- Guidance on searching for a job, assessments and selection procedures
- Masterclasses on writing CVs and attending interviews and assessment centres
- Career support (with a tailored support service for international students and students with disabilities)
- The careers team host weekly career webinars
- We offer tailored and personalised, 121 careers guidance and coaching.

(www.uwl.ac.uk/careers

Volunteering

Volunteering is the perfect opportunity to develop leadership, management and employability skills – and it looks great on your CV. It gives you a chance to make a difference and make friends.

Our Volunteering Team will give you weekly updates on opportunities that would benefit you and advice on choosing the right one.

Employment

Whether you are ready to start planning your professional career, or if you simply need a part-time job while you study, our Employment Team can provide:

- Notifications for relevant job vacancies
- Employment information from regional, national and international employers
- Advice on boosting your employability
- Information about upcoming employment events
- Talent Bank Jobs on campus
- Graduate Talent Bank matched recruitment with graduate employers
- Virtual Employer take over sessions
- Employers within the curriculum.

(O, www.uwl.ac.uk/careers

Work placements

Completing a work placement as part of your degree is a great way to show employers that you have the skills, experience and capabilities they are looking for.

Review the our prospectus and the website (uwl.ac.uk) to find out if your chosen course offers an integrated placement, internship or work experience option.

Our Placements Team can offer you:

- Career-specific placements with recognised industry leaders
- Regular updates about new placements
- Information about recruitment and employability events.

 (\mathcal{O}_{I}) www.uwl.ac.uk/work-experience

Where will your degree take you?

Graduate Outcomes is the biggest UK annual social survey and captures the perspectives and current status of recent graduates. The survey exists to improve the experience of future students and to understand more about your career path and experiences after leaving higher education. All graduates will be contacted 15 months after they graduate and asked to complete a Graduate Outcomes questionnaire.

For more information about UWL leavers, details of further studies, employment rates and average salaries, visit uwl.ac.uk/graduateoutcomes

The

=I'm-real-world-ready

university

Get unrivalled real-world experience with our state-of-the-art facilities

We are committed to giving you the best university experience possible and a taste of things to come. So we are constantly updating our research, training and leisure facilities. It is a university experience that aims to make you ready for your future career.

Biomedical Science Labs

The Biomedical Sciences laboratories are fitted to an extremely high standard, allowing us to deliver our modern, forward-looking curriculum at a practical level, providing laboratory training that will give you the best possible start as a research or clinical scientist. Everything in the labs, from pipettes to microscopes, has been recently installed, so you will be learning to use equipment identical to that in modern pharmaceutical, nutritional and clinical laboratories.

Blast Radio Studios

Every official student radio station needs its own broadcasting studio, and Blast Radio has one. It is the perfect environment for future broadcasters as the teaching studio is right next door, so you can experience first hand what a broadcasting career looks and sounds like.

Computing, Engineering and Built Environment Facilities

These industry standard facilities include a concrete-testing laboratory, geotechnics and soil engineering laboratories, a hydraulics laboratory and an architecture studio. We have dedicated computing laboratories including cyber security, artificial intelligence and machine learning laboratories.

Concert Hall - Vestry Hall

A classical music performance space which has just been restored to its original victorian character, features a Steinway D concert grand piano, a full compliment of orchestral percussion instruments and seating for 60. The hall is connected to two state-on-the-art recording and mixing studios featuring an industry-standard Neve recording console and Dolby Atmos surround-sound.

Crime Scence Rooms

Our dedicated crime scene rooms give students the opportunity to practice evidence collection and crime scene analysis techniques.

Flight Pad

To support the development of our Commercial Pilots and Air Transport Management students, the London Geller College of Hospitality and Tourism utilises a state-of-the-art Boeing 737-800 flight simulator. The Flight Pad can replicate any scenario and fly to any airport around the world, which makes it realistic for pilot training.

Forensic Science Labs

Our labs include industry-standard equipment including DNA and Fingermark analysis.

Mock Court Room

Our impressive mock court room gives students at the School of Law a chance to practise mooting, trial strategy and advocacy. You will have legal training in a realistic, inspiring environment.

Music Recording Studio and Labs

Our £1m+ investment in the Paragon Annex Studios makes our music complex one of the biggest in the country. Combined with facilities at our Ealing campus, we have 11 recording studios, 2 teaching studios and 2 electronic music labs housing some of the world's rarest and most soughtafter vintage and modern equipment.

Other Creative Subject Facilities

Professionally-equipped studios for photography including a dark room, radio and TV production studios as well as print, sewing, knitting and pattern-cutting facilities. We also have music practice pods, sound studios and recording studios across our campus sites.

Performance Centre – Lawrence Hall

Our modern space immerses London College of Music students in the reality of professional performance and features a stage, Tungsten and LED performance lighting and advanced sound and audio visual systems.

Pillars Training Restaurant

Our training restaurant helps London Geller College of Hospitality and Tourism students practise their professional skills and gain real experience in the service environment. The Savoy Educational Trust Kitchen has industry-standard facilities too.

Psychology Research Facilities

Our psychology research facilities include state-of-the-art brain imaging electroencephalogram (EEG), eye tracking equipment, psychometric tests and industrystandard research software.

Simulation Centres for Nursing, Midwifery, Paramedic Science Operating Department Practice and Healthcare

If you are an aspiring health professional, our centres in Brentford and Reading provide outstanding facilities (including virtual reality and immersive rooms and a 'simbulance') and specialist teachers to help you learn and develop the practical skills and knowledge required in modern healthcare settings. We also provide training post qualification, supporting you to develop the knowledge and skills required for senior clinical roles.

The Faringdon Centre

The Faringdon Research Centre for Non-Destructive Testing and Remote Sensing in the School of Computing and Engineering, has a wide range of sophisticated technologies and equipment, including Ground Penetrating Radar systems (seven different sets of antenna systems from low to very high frequency antenna systems); a Light Falling Weight Deflectometer (LFWD); a 3D-Laser Scanner; an IBIS-FS Interferometric Radar System for monitoring structural movements, deflections and vibrations; and many more. The centre is carrying out several pioneering research projects in collaboration with industry and international partners.

The Geller Institute of Ageing and Memory

The Geller Institute of Ageing and Memory (GIAM) delivers research and education that informs and improves quality of care and support for people living with dementia, their families, and health and social staff caring for them. GIAM examines care across a range of care settings and for a diverse range of people.

West London Food Innovation Centre

The West London Food
Innovation Centre assists food
and drink start-ups as well
as small and medium-sized
enterprises to turn innovative
concepts into marketable products.
It offers services ranging from
product formulation to sensory
evaluation and facilitates a
scientific approach to new product
development for its clients.

Westmont Enterprise Hub

Westmont Enterprise Hub is an "Ideas Space" for early stage start-ups and an incubator for entrepreneur pre-market businesses sourced from within the University (student, staff, researchers and alumni) and from the local community. It provides endless opportunities to ideate, innovate and evolve business solutions using peer mentoring, specialist business advisors and effective networking opportunities through targeted meet-ups, workshops, coaching and mentoring within a bespoke plan of programmed intervention and support.

Weston Hall

The University's beautiful auditorium is comfortable and inspiring place to learn in. It can seat over 400 people at conferences, lectures, performances and academic events. It can also double as a concert hall for classical music and theatre.

Setting you up for success

IT Facilities

Our IT is just one of the many facilities we have on campus to make your life as a student easier. Our teams work together to build a dynamic computing environment including a high-speed network for the University's community allowing you to connect your personal devices to the campus network. During your time with us you will be able to enjoy the following features:

- WiFi across all our campuses and on our shuttle buses.
- Access to PCs and Apple Macs on campus
- Microsoft Office software for free
- Office 365 email
- Access to the Student Portal
- Access to Blackboard online learning environment
- Access to 5 TB of MS OneDrive cloudbased storage.

Student Portal

The Student Portal should be your first port of call for any information or advice. It is a single place for you to find and access online services and information that you will need during your time here, including:

- Your timetable
- Access to learning resources on Blackboard
- Access to your UWL e-mail
- Up-to-date notices, news items and information
- Access to Library resources
- Advice, help and support
- Online storage space through UWL OneDrive
- Access to a huge library of online tutorials using LinkedIn Learnin

MyUWL App

This is the official University of West London mobile application for active students. It gives easy access to

- your timetable, including push notifications for any timetable changes and other important information,
- find your classroom with room-byroom campus navigation and direction wayfinding
- real-time shuttle bus information
- easy access to the Student Hub and all the support available therein.

Libraries

As your studies progress, there is one place you will want to take full advantage of – the UWL library. More than just a building full of books, the library will form a central part of your university life. It is a place to study All students at UWL automatically belong to our libraries at both Ealing and Reading which provide study spaces, PC and iMac workstations and space to use your own devices. As well as an extensive range of hard copy books, journals, magazines and newspapers, you can access a vast array of digital resources including the Perlego ebook collection.

West London Campus Library

The Paul Hamlyn Library at Ealing is open 24/7 during term time to enable you to study around your personal and work schedules. The library is a light open space spread across three floors with different types of study environments to suit your requirements at various times including group study rooms and zones, 1:1 and personal spaces. And of course, a variety of furniture to suit your needs.

Reading Campus Library

Nursing, Midwifery and Health. The Library covers nursing and health-related topics, along with computers, study spaces, and library support.

All library sites are equipped with PCs and printers, copiers and scanners. Each course has a Librarian who can help you with using the library's search tools so that you can find, evaluate and reference information sources. Additional support can be found within the library buildings as well as through appointments at the Brentford site and online via our chat service. The Brentford site also has a book collection and returns service.

Perlego ebook collection

Perlego is an online library of books, academic texts and tools and all students at UWL will have access to the Perlego ebook collection. There is unlimited access to over 1 million ebooks and covers the many different subject areas taught across UWL.

Our west London campus has great transport links to central London, which is bursting with successful businesses, industry leaders and a career-driven culture that grips you from the start.

When you are not busy exploring its inspiring business districts, you can opt for some of the UK's best art galleries, fashion exhibitions, museums, sport, music, comedy, theatre, nightclubs, restaurants and shopping.

Our Ealing site

Our modern Ealing site is a safe, comfortable and inspiring place to study. It has a laid-back and friendly atmosphere, with attractive surroundings.

It is also right in the middle of west London's prosperous business hub and close to many of the employers we work with. You will have lots of chances to gain useful work experience, get first-hand knowledge of your industry and start building the connections you will need from here on in.

Our Brentford site

The Brentford site of our west London campus is home to three of the University's nine academic schools – School of Human and Social Sciences, College of Nursing, Midwifery and Healthcare and the Claude Littner Business School.

This site is located close to our Ealing site with a free shuttle bus running between sites and Ealing Broadway station.

Reading campus

The Berkshire Institute for Health, situated in Reading, is home to our College of Nursing, Midwifery and Healthcare. The campus is 30 minutes from London Paddington by train.

Both our campuses will provide you with the best training and practical opportunities for your career.

The

-alusays-here-for-me

university

Feel supported at every step

We love that the UWL community is incredibly diverse; our students and tutors come from all over the world and bring fresh perspectives, skills and areas of expertise to our vibrant learning environment. Our community is made up of people of all ages, ethnicities, abilities, religions, political views and socio-economic backgrounds.

William Brake Student Services

We want you to get the most out of your time with us, so come and talk to us if you are worried about anything. It doesn't matter if you are based in Ealing, Brentford or Reading; our student services are available to everyone, and you will find appointments and drop-in sessions on the site nearest you.

Funding and Money Advice

Confidential and specialist advice is available on student funding, budgeting, money management, welfare benefits and council tax exemption. The team can advise on extra financial assistance from a range of funds, scholarships and bursaries.

International Student Advice

The Student Advice Team offer advice to our international students. They will help with any questions

about visa extensions, your immigration status and support whilst studying.

Disability and Mental Health Support

We are fully committed to supporting students with disabilities (including but not limited to; specific learning differences, physical disabilities, long-term medical conditions, Autism and mental health conditions).

Our Disability and Mental Health team are here to provide you with specialist and confidential advice and guidance on a range of support available:

- Individual Support Plans (ISPs)
 which outlines reasonable
 adjustments in the teaching and
 learning environment, classroom,
 examinations, library, and for
 physical accessibility.
- Applying for Disabled Students Allowance (DSA) and other disability related funding
- Neurodiversity screening and assessments for dyslexia, dyspraxia or ADHD.
- Accessing Assitive Technology
 The support we offer you is
 flexible and tailored to meet your
 individual needs. The support
 we provide is optional and you
 have control whether you wish to
 engage in our support or not.

Student Counselling

We offer professional, therapeutic and psychological support for students wishing to explore any difficulties they may be experiencing. Our team of counsellors provide a safe and confidential space to talk about life and anything that may be confusing, painful, or uncomfortable

The Welfare Team

The Welfare Team are nonjudgemental, here to listen and offer a safe and welcoming service to all students who are worried, anxious or in crisis over personal problems.

We provide impartial advice, support and information if you are concerned about issues such as relationships, stress, conflict, sexual violence, homelessness or abuse.

Interfaith Advisor

Our Interfaith advisor is here to provide confidential pastoral support and encourage interfaith dialogue and cohesion across our diverse community regardless of religious or non-religious belief. Please speak to our advisor for information relating to UWL's Prayer and Contemplation rooms for quiet reflection, contemplation and prayer, situated at our various campuses and sites.

For more information visit:

Study Support

The Study Support Team offers a range of support opportunities to help students develop their skills and academic technique. Delivered through one-to-one appointments and group workshops, both online and in-person, this support is available to all UWL students.

Our support includes:

- Academic Writing and Study Skills Support
- English Language Support
- Maths Support
- IT Skills Support

Peer Mentoring Scheme

The Peer Mentoring Scheme is an opportunity for students to be paired with a student mentor who has completed a year of study on a similar course to them. By sharing their experience of UWL and their course, a mentor can help mentees gain a greater understanding of what is required and give them clearer insight into what lies ahead.

backgrounds.

The support

and socio-economic

The support you need

We are all about support, diversity and inclusion.
We believe that everyone has the ability to excel in their career – especially with our help – and that no one should miss out.

We'll help you feel at home

We know that accommodation is key to your university experience and you want to love where you live.

All our sites are fully managed with 24/7 security onsite to provide safe and secure accommodation with high levels of Health and Safety compliance.

We offer a range of options that are competitively priced in the surrounding areas of Ealing, Acton, White City and Wembley.

If you are studying at the Berkshire Institute for Health in Reading, we have strong links with local student accommodation providers, so you can feel safe in the knowledge that your home has our stamp of approval.

Shared student accommodation

- Contents insurance included
- Council tax exemption
- No deposit required
- Free utility bills
- No guarantor.

Live your best life with the Students' Union

The award-winning University of West London Students' Union (UWLSU) is a democratically-led organisation. Every year, students elect three Sabbatical Officers to represent your views to UWL. We also offer a range of fantastic things for you to enjoy and get involved in.

Arts, eateries and events

Our West London campus in Ealing is a great place to relax, socialise and explore. Whether you are into live music, quizzes, comedy, clubbing, or just chilling with friends, you will find something to suit you. Our vibrant UWLSU space on campus is a popular hangout. Here you will find the Coffee Union and Freddie's, where you can buy food and drinks. UWLSU employs

students to work throughout the

union, from front of house to behind the scenes. Plus, all profits go back into student activities.

As well as Freshers' Week, the Students' Union hosts events throughout the year including Black History Month, LGBTQ+ History Month and Halloween.

State-of-the-art fitness

UWL have just launched a brand new sports centre which is run by UWLSU, consisting of two modern gyms, two large fitness studios and spacious changing facilities. We also offer free classes that cater for every level of ability.

UWLSU are there for you throughout your journey at UWL. Whether you want to join a society, play for a sports team, run in an election or become a course rep, UWLSU has lots of ways for you to get involved. There is also a dedicated advice service. With great training opportunities for course reps and student delegates, plus a range of student jobs, you can add new skills and responsibilities to your CV – perfect for your future career.

A warm welcome to our international students

Before studying with us

Before joining us, you can get all kinds of support and advice from the International Office including how to apply and information about studying at the University.

During your studies

Once you are at the University, our support includes:

- An international orientation programme, designed to help with enrolment and social activities
- Advice on finances and opening bank accounts
- Information about international student organisations across the UK.

You can also get specialist advice and support from our Student Services, including student support, visa support and information on finance and accommodation

Studying with us for a shorter period? Study Abroad Programme

If you are already studying at a university in your home country and would like to study in London with us for one or two semesters, you can apply to take part in our Study Abroad

Programme. You will gain experience studying in London while obtaining credits which may be valid towards your degree at your home institution.

Scholarships and Funding

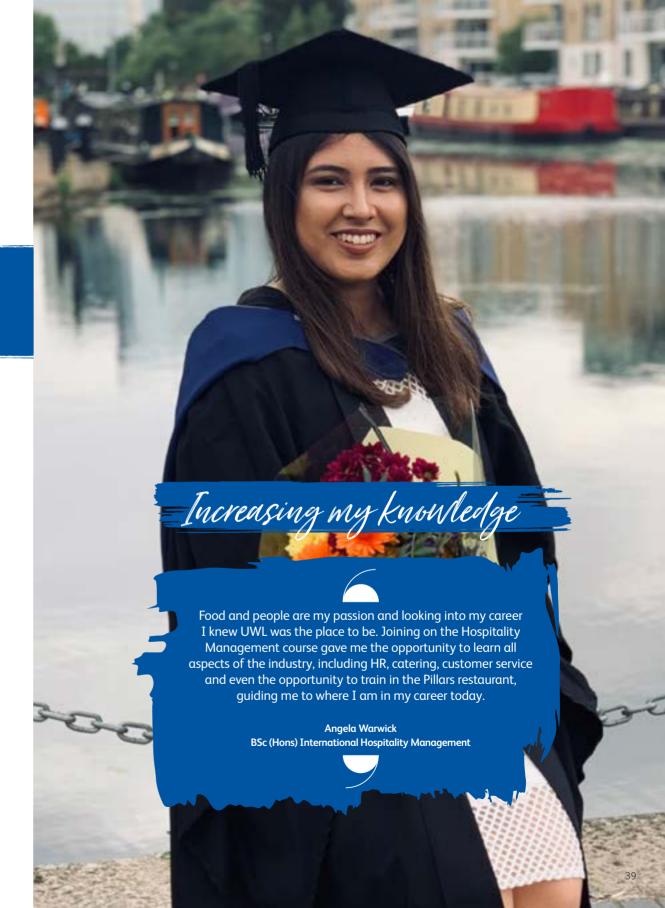

We offer students subject to overseas fees the chance to apply for one of our International Ambassador Scholarships worth up to £5,000.

These are available for both the February and September intakes. For more details visit: www.uwl.ac.uk/fees-and-funding.

Please also note US students may be entitled to US Federal Direct Loans. For further information e-mail: us.loans@uwl.ac.uk

To find out more, or to contact a member of the International Team, visit www.uwl.ac.uk/international or e-mail international@uwl.ac.uk

Even before you join, you can get all kinds of support and advice from the International Office.

Bringing students and businesses together and creating unique learning opportunities. Here for enhancing skills and employability.

markets, investment or strategy and leadership, we'll prepare you to be a highly effective professional in the

London's commercial district, and our strong links with business and professional associations ensure that our students benefit from a careerfocused curriculum. We have one of the highest graduate employability

students to gain invaluable real world experience by working on live business problems. Aspiring entrepreneurs get direct support to develop their ideas into business start-ups.

Our global network of alumni and business partners offers opportunities for students to develop highly beneficial links and collaborations.

> Our in-class teaching is informed by the latest research and cutting-edge global practices.

We provide excellent education and research in computing, built environment, mathematics and statistics, and engineering (civil engineering, electrical and electronic engineering and sound engineering). Through our courses, research and partnership programmes, we are leaders in the STEM subjects in the sector. A great majority of our courses are accredited by professional bodies, and we work and collaborate closely with more than 100 companies, enterprises, and institutions. Together we will give you the start you want for your career.

Our staff have contributed to the STEM debate by publishing over 350 journal articles, book chapters and international conference papers over the last three years. Current research and collaboration projects include:

- Integrating user-centred design in applications of non-destructive methods (Ground Penetrating Radar, 3D Laser Scanner, Interferometric Radar System and InSAR Satellite Imaging) in health monitoring of bridges, highways, rail tracks and airfield runways. This is in collaboration with the Rochester Bridge Trust, the National Technical University of Athens, Roma Tre University, Italy, Italian Space Agency, Umbria Aerospace System, Italy, and many other partners.
- Automatic quality assessment and classification of echocardiographic images using deep convolutional neural network.

- Applications of Ground Penetrating Radar (GPR) in detecting defects and internal decay of ancient trees and mapping tree root architecture

 a partnership with the Roma
 Tre University, Italian National
 Research Council, London Borough of Ealing, and UK based charities, councils and organisations.
- Working closely with Amazon Web Services on the AWS Educate programme.
- Computational intelligence and intelligent systems: machine learning, computer vision processing, natural language processing, big data processing and analytics.
- Development of a novel electroglottography system, using advanced electronics and deep learning.

- Collaboration with Hilton
 Worldwide, the Chartered
 Institution of Building Services
 Engineers (CIBSE), Institution of
 Civil Engineers and the Chartered
 Institution of Highways
 and Transportation.
- Optimal design, rehabilitation and operation of water distribution, sewer systems and GIS applications in water resources management.
- Thermal and mechanical properties of construction materials.

newly developed research centres.

laboratories and studios.

Whether you are interested in advertising and public relations, broadcast journalism, fashion and textiles, film production, graphic design, media and communications, photography, radio and audio production, or visual effects, we have a course to suit you.

Equally as important, we are located at the hub of the UK's creative and media industries and we have links with global players in all of them. It is a worldwide growth market, and one that demands in-depth experience, teamwork and collaboration skills. So you will be taught industry best practice by people who have worked in it.

Wherever possible, you will have the chance to complete a work placement. That has led to many of our students being offered jobs on graduation. We will also encourage you to take guidance from your personal tutor about your career. With the employability skills we teach you, tips on how to manage your career progression and even entrepreneurial advice if you plan to set up on your own, you will be well-equipped for the creative career you want.

Our graduates have gone on to work with the BBC, Sky, Channel 4, Framestore, Moving Picture Company, BAFTA, Greenpeace and Ted Baker. Food charity City Harvest launches advertising campaign designed by UWL students

West London-based food charity City Harvest recently launched an ad campaign designed by third year BA (Hons) Advertising and Public Relations students.

modern radio stations broadcasting the student-run station Blast FM.

We are a leading college for hospitality and tourism; from chief executive to lecturer, and executive chef to author, our students have carved out successful careers

The last few years has seen unprecedented innovation and change across the service sector; join one of our career-focused courses and graduate in a strong position to be a part of the industry's transformation. Our courses offer opportunities to discuss issues facing industry, such as sustainability, AI. consolidation and future strategies, whilst examining solutions from a sector perspective..

Our course content is developed with support from a wide network of business professionals to include changes in the industry and we are proud to involve experts in our quest lectures and workshops to directly connect you to the industry into which you will graduate.

Our courses will prepare you to lead effectively in an ever-evolving sector, with the skills and confidence needed to tackle the issues the sector is facing today and into the future.

Amazing facilities

Our award-winning training restaurant, Pillars, the very latest Boeing 737 and the West London Food Innovation Centre.

As a College, we consistently look to the future of the industries we support. Our suite of courses has been developed with innovation and adaptation in mind to best serve aviation. culinary and nutrition. events, hospitality and tourism graduates to enter the iob market as the next generation of industry leaders.

Our courses in psychology, criminology, forensic science, nutritional therapy, politics and international relations, sociology, and education empower and equip you to shape a sustainable and healthy society.

Experience exceptional support and engaging learning from our dedicated staff team. Our dynamic, real-life teaching approaches ensure you're not just learning but also living what you study. Gain practical skills that set you apart, making you a future-ready graduate, sought-after by employers.

Step into a cutting-edge learning environment! Our school boasts modern technologies and instrumentation such as an electroencephalograph, eye-tracking technology and other physiological equipment. We have dedicated crime scene simulation rooms and a range of industry-standard equipment in our newly refurbished forensic science labs including DNA and fingermark analysis. We are dedicated to ensuring you receive a supportive and dynamic learning experience that nurtures the

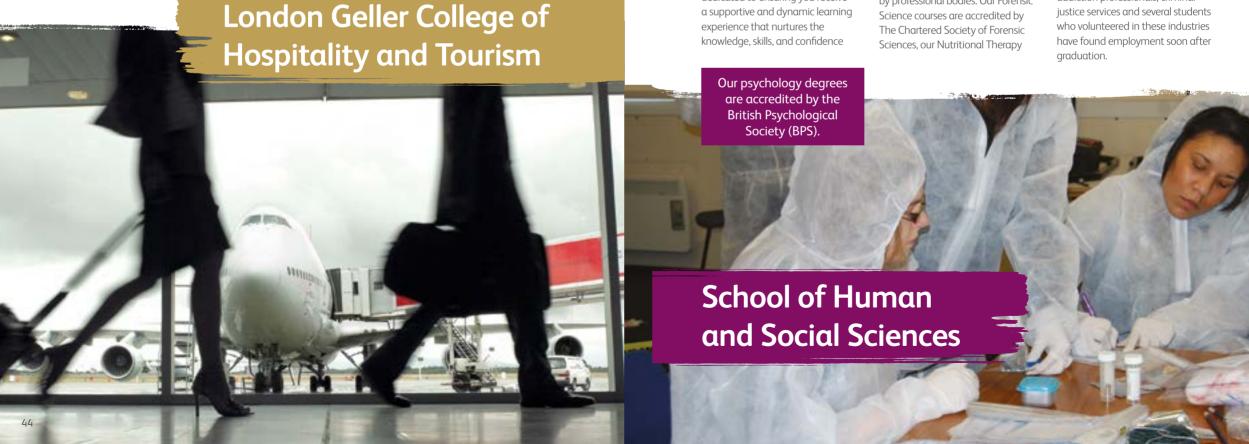

essential for your academic and professional growth.

You can choose single honours or multidisciplinary pathways, accessing diverse teaching facilities across our school and the wider University. Our courses are contemporary, look to the future, and are designed and taught by highly experienced staff, who are active researchers. Our lecturers publish in international iournals and work with stakeholders in their areas to improve practice and develop policy, drawing on their links with industry and practice to support the growth of highly skilled students who are ready for the future.

The design and delivery of our courses is enhanced by feedback from our students and employers. Many of our courses are accredited by professional bodies. Our Forensic

courses are accredited by the Nutritional Therapy Education Commission and our Psychology courses have been accredited by The British Psychological Society (BPS) since 1986. Our Criminology programmes follow the guidance of the British Society of Criminology, and our Politics and International Relations courses are committed to the principles of the United Nations Academic Impact (UNAI). Our courses are committed to equity, diversity, inclusion and sustainability and specifically designed to empower graduating students to have a positive impact on individuals, communities and our global society.

We have good collaborative links with local and national employers and services, such as the police, addiction professionals, criminal who volunteered in these industries have found employment soon after

The Biomedical Sciences labs are fitted to an extremely high standard, allowing us to deliver our modern, forward-looking curriculum at a practical level, providing laboratory training that will give you the best possible start as a research or clinical scientist.

School of Medicine and Biosciences

The professionally-focused LLB (Hons) at the School of Law will help you develop the knowledge and skills to forge a successful career in law.

Our dedicated professionals have a range of academic, practical and professional experience, and are on hand to help with your studies. Like us, they believe you will learn best through a mixture of reading and real-world contact.

To help you develop, we host regular events with solicitors, barristers, judges, recruitment specialists, prosecutors, legal advice centres and honorary professors.

Our LLB (Hons) course is well taught, professionally relevant and amazing preparation for your future.

Strong sector-wide contacts with judiciary, local firms, barrister chambers and the Middlesex Law Society.

School trips to The Hague and ICC/ICJ, Krakow/Auschwitz-Birkenau concentration camp, and to Nuremberg 40 minutes to Chancery Lane, home to Law Society headquarters, Inns of Court and Royal Courts of Justice.

Dedicated law library collection, law librarian and mock courtroom.

No 1 in London for Satisfaction with the Course, Assessment and Teaching

The Guardian University
Guide 2024

Our law courses are ranked #2 in the UK National Student Survey 2023 Prepare for a rewarding career enabling you to make a real difference to human health by studying a course focussed on developing practical skills informed by cutting-edge research.

Our School offers a range of exciting and stimulating degrees designed to expand your knowledge, develop your personal and interpersonal skills, and enhance your employability.

Whichever course you choose, you will work in an environment that takes you seriously, on a degree course designed to help you realise and develop your potential. Our degrees prepare you for a wide range of careers in healthcare, teaching and research – whether you want to work in the NHS, in academia, medical research laboratories, pharmaceutical research, in health

education and public health or areas such as international aid and development.

School staff include leading researchers in their fields, in diverse areas including cancer research, genomics, pharmacology, ageing and memory, and translational medicine. As an undergraduate, you will be part of a learning environment that includes cutting-edge research and postgraduate study. You will also be part of an interdisciplinary community, sharing relevant modules with students studying other scientific degrees, but also specialising in the area that fascinates you most.

All degrees provide the option of a placement year module to develop your employability skillset and enhance professional development and career prospects.

All degrees include a final year independent research project allowing students to focus their studies on their own specific interests and career goals.

London College of Music (LCM) is the largest specialist music and performing arts institution in the UK. Our innovative courses are respected worldwide.

Teaching is vocationally and creatively focused, and delivered by staff who are recognised on an international platform.

LCM is located at the heart of the UK's music and media industries. As a student you will enjoy a variety of performance opportunities in and outside of the University, plus the chance to collaborate with fellow students within a lively music and performing arts community.

Regular masterclasses and seminars from industry professionals give you real insight into the world of work, plus instrumental and vocal coaching to support your studies.

We are proud of our all-Steinway school status – so as a performer, accompanist or a recording engineer you will be able to access the best pianos in the world.

As part of our vision for the future, LCM has invested in Europe's largest RedNet installation, as well as modern studios including acoustically designed recording studios and multi-performance production studios. Recently, we have invested in a new multifunctional performance space at the heart of LCM. This, together with professionally equipped production rooms for all aspects of performing arts, enables us to meet the industry needs of the 21st century.

REDNET®

18 professionally designed studios including nine tracking and mixing studios.

22 Steinway pianos

Over 180 events, workshops and masterclasses every year.

Could you be the future of nursing, midwifery, operating department practice, social work or public health?

Our innovative courses offered across our west London and Reading campuses, will enable you to develop the knowledge and skills to deliver high quality, impactful health and social care, within a fast-paced and rapidly evolving sector, placing the needs of individuals and their families at the centre.

On our pre-registration courses, you'll spend equal amounts of time studying in University and learning in the health/social care environment. We partner with a wide range of NHS Trusts and private, voluntary and independent sector healthcare organisations, to offer a diverse range of health/social care placements, ensuring you are job ready. Our simulation centres equipped with the latest

technology (including virtual reality and immersive rooms), will help you practise your clinical skills in a safe environment, whilst being supported by expert dedicated academic staff and technicians.

We design our courses to provide

a student-centred, engaging and intellectually stimulating learning experience. Emphasis is placed on interprofessional learning and working and building resilience and well-being, effectively preparing you for your career as a health/social care professional and as a future leader. We're here for people who want to deliver the best health/social care. We're here for you! We look forward to welcoming you to the College of

Nursing, Midwifery and Healthcare.

Our health and social care provider partners invest in our students from the very beginning, ensuring our courses are contemporary and relevant.

A connected education:

Our link with NHS Trusts, Local Authorities and the private, voluntary and independent sector provide excellent learning opportunities.

Our nursing courses are ranked No 1 in London

Institute for Policing Studies

The Institute for Policing Studies (IPS) is an exciting new development within the University. Its creation reflects the increasing role of Higher Education in the policing community in London and the UK.

The policing landscape has changed dramatically over the last decade and police education has changed to meet the new demands of cybercrime, terrorism and to reflect the increasing "social" role that the police play in dealing with victims in the community.

The advent of cyber-enabled and cyber-dependent crime has provided fresh policing challenges alongside existing issues appearing in these new contexts. Leadership in policing routinely covers international boundaries and jurisdictions, but the core skills of policing remain.

The Institute promotes these aspects of professional policing while reflecting on the lessons learnt from historic investigations such as the Yorkshire Ripper case, the Steven Lawrence enquiry and modern cases and critical incidents.

The scale and scope of what officers police in the UK is wide-ranging; from lost children to rural crime, from natural disasters such as flooding to public order events, from terrorism to dealing with victims of sexual assault and domestic violence. The British model of dealing with a serious crime such as homicide is world-class and the Institute's staff have experience in major investigations in the UK, America, and the Middle East.

Enhanced career prospects:

We pride ourselves on bridging academia and practical policing.

A connected education:

Taught by staff with a strong operational background in policing and extensive academic experience.

BA (Hons)

Accounting and Finance

On this course you will learn essential principles whilst developing the practical skills you need to succeed.

What you will study

You will learn from professional accountants who will support your academic and career goals, equipping you to compete in the financial jobs market.

The course is designed to maximise exemptions from the exams set by professional accountancy bodies such as the Association of Chartered Certified Accountants (ACCA).

This means you will sit fewer ACCA exams and you could shorten the length of time it takes you to gain your professional qualification

Where your career will take you

Accounting firms – especially large international ones – offer a wide range of career opportunities, including auditing and assurance work, corporate finance, human resources and tax planning.

BA (Hons) Acting (Performance)

This innovative course combines training in stage and screen acting with critical thinking and entrepreneurial skills, to equip you for a career in the entertainment industry of the twenty-first century.

What you will study

This course is taught through practice. Skills-based workshops are combined with practical, director-led projects, giving you professional industry-focused training from day one.

You will investigate established and new texts, as well as performance practices from around the world, integrating technology and performance throughout your learning journey.

We place emphasis on inclusive practice within our work and train multi-skilled, proactive content-creators, ready to forge the industry of tomorrow.

Where your career will take you

Upon graduation, you could go on to work as an actor, director, playwright, film-maker, theatre-maker, dramaturg, creative producer, casting director, arts administrator or teacher.

BNursing (Hons) Adult – Entry Point for Registered Nursing Associates

This 18-month full-time route has been designed for Nursing Associates registered with the NMC, who wish to become an adult nurse, recognising prior certified learning.

What you will study

On this course you will learn how to deliver care to the high standards set by the Nursing and Midwifery Council. The aim is to equip you with the skills and knowledge to face the challenges of nursing in the twenty-first century.

This course will prepare you to care for adults of all ages (aged 18+), who are recovering from an accident or acute illness, learning to live with a chronic health condition or at the end of their lives. You will also learn how to empower people to make a difference to their own physical and mental health.

Where your career will take you

Many of our graduates secure jobs with local NHS Trusts or healthcare organisations.

- This course is available to candidates who have successfully completed either a 'Health Education England' or NMC curriculum Nursing Associate Foundation Degree
- You must hold registration with the NMC as a Nursing Associate

This BNursing degree is equivalent to a BSc Honours in Nursing in level and upon completion of the course, you will be eligible to register with the Nursing and Midwifery Council as an Adult Nurse.

BNursing (Hons) **Adult Nursing (Pre-registration)**

This course will prepare you to care for adults of all ages (aged 18+), who are recovering from an accident or acute illness, learning to live with a chronic health condition or at the end of their lives.

What you will study

This course (equivalent to a BSc Honours in Nursing) will enable you to become a knowledgeable, compassionate and skilled graduate nurse, capable of meeting the physical and mental health needs of adults in a range of healthcare settings, via the delivery of safe, and effective nursing care.

You will split your time equally between learning theory on campus and applying your knowledge in practice, across a range of healthcare settings, where you will be supported by subject specialists, who will provide you with personalised feedback. Our simulation centres (including virtual reality and immersive rooms) will help you practise your clinical skills in a safe environment. On successful completion of the course you will be eligible to apply to register with the Nursing and Midwifery Council as an Adult Nurse, and will receive an undergraduate honours degree.

Where your career will take you

Our graduate nurses are highly sought after. They secure jobs in NHS Trusts/healthcare organisations, who offer preceptorship programmes and a range of developmental opportunities.

No 2 modern* university in London for Nursing
The Complete University Guide 2024

*a modern university is a university established in 1992, or after.

BA (Hons) **Advertising and Public Relations**

This exciting interdisciplinary degree will teach you all about the fastpaced world of integrated creative communications, whilst providing plenty of hands-on experience.

What you will study

This interdisciplinary course is designed to provide you with a holistic view of marketing, advertising and PR, helping you understand how the communications industry works as a whole.

This course is all about hands-on, real-world experience. Under the guidance of expert academic and industry practitioners, you will work on live marketing campaign briefs from real clients, student competitions and individual projects tailored to your interests. You will therefore build a creative portfolio to help you land the roles you want upon graduation.

Students are members of the PRCA (Public Relations and Consultants Association), one of the trade bodies that represents the public relations industry in the UK, giving you a strong professional network.

Where your career will take you

Upon graduation, you could go on to work in advertising, public relations or marketing, in roles including creative or art direction, copywriting, strategy, social media management or content production.

BSc (Hons) Airline and Airport Management

This course provides you with the knowledge and skills required to pursue a leadership management role within the aviation industry.

What you will study

Designed in consultation with graduate employers, the course covers both the commercial and operational management of airlines, airports and aviation support services.

Throughout the course you will learn about a variety of aviation business models and strategies, discover how airports enable people to move around the globe, learn how the global aviation system operates in a safe and efficient manner and much more.

The placement option will give you the opportunity to experience employment within the industry to accelerate your career and put theory into practice.

Where your career will take you

Upon completion, graduates can progress to a management career working for an airline, an airport or in hundreds of organisations that directly and indirectly support the aviation industry. Your skills and expertise will also be attractive to the transport, travel and logistics industry.

BSc (Hons)

Architectural Design Technology

Are you interested in how buildings are designed? As an architectural technologist and designer, you will have the expertise to advise planners, property developers and constructors on their building projects.

What you will study

This technical design course prepares you to judge building design proposals, investigate building problems and offer effective design solutions.

You will develop an understanding of building materials and technologies. You will work with Computer Aided Design (CAD) and Building Information Modelling (BIM) software – key tools for a design career within the construction industry.

On this architectural technology degree, our teaching approach incorporates a wide range of methodologies. This includes visits to construction sites and materials manufacturers, which will help you contextualise the principles you study within real-world situations.

Where your career will take you

You could go on to work for architectural technology practices, architecture firms and local authorities.

This technical design course prepares you to judge building design proposals, investigate building problems and offer effective design solutions.

You will develop an understanding of building materials and technologies, and work with Computer Aided Design (CAD) and Building Information Modelling (BIM) software – key tools for a design career within the construction industry.

On this Architectural Technology degree, our teaching approach incorporates a wide range of methodologies. This includes visits to construction sites and materials manufacturers, which will help you to put the principles you study into a real-world context. You will work within a team on a group construction project to put those principles into practice.

Where your career will take you

Once you complete the course, you will be able to work as an architectural technologist within the construction, planning or property industries. You could go on to work for architectural technology practices, architecture firms or local authorities.

- Award FdSc
- Duration
 Day-release 2 years
- Start date
 September

FdSc

Assistant Practitioner (Health)

This foundation degree is a two-year part-time intensive course. It combines academic study at the University for one day a week with workplace learning, where you will be supported by a mentor.

What you will study

If you are working in a health or social care setting, the course is suitable for you. It will enable you to develop your knowledge and skills in order to provide high-quality care. Practice-based learning forms a large part of the course and you will complete workplace competencies, which ensures you are able to apply and consolidate your classroom-based learning.

Where your career will take you

On completion of the course, you will be eligible to apply for a Band 4 Assistant Practitioner post in a health/ social care setting. Alternatively, you could apply for pre-registration nursing, Operating Department Practice, Physiotherapy or a similar healthcare courses.

- Award FdSc
- Duration Intensive part-time 2 years
- Start date
 October
- Location
 West London Campus/Berkshire
 Institute for Health (Reading)

Entry requirements

- Must be working in a health or social care environment for a minimum of 20hrs/week.
- Applicants will usually hold GCSE English and Mathematics, or will be supported to undertake Functional Skills Level 2 English and maths on the course.

For full list of entry requirements, scan the QR code.

BSc (Hons)

Audio Software Engineering

This degree in audio software engineering will enable you to find work in a range of industry sectors where audio software, coding and development are part of the skillset employers are looking for.

What you will study

Through the course study material, you will look at how audio is being produced for music, video, games, broadcast, performance, and many additional areas.

Consumers and producers are demanding more sophisticated and broad-ranging applications that include audio as a component.

Become part of the response to these needs, through developing specialised skills in:

- coding and software development
- digital signal processing
- audio engineering and production
- artificial intelligence.

Where your career will take you

Once you graduate you could go to work in signal processing for audio, immersive audio (3D), broadcasting and online delivery and audio for games.

- Award BSc (Hons)
- UCAS Code I300 I301 with Foundation

BSc (Hons) Aviation Management with Commercial Pilot Training

This course will prepare you to enter the industry as a First Officer and a competent, confident and well-informed member of the flight crew.

What you will study

Studying for a university degree alongside your flight training will provide you with a distinct advantage over your peers, enabling you to graduate better prepared for airline operations, as well as being equipped with the necessary management and business skills to support your future.

The course comprises two main elements; Commercial Pilot Training with Skyborne (240 credits) focuses on the academic and practical aspects of flying training and includes ATPL exams.

Aviation Management with UWL (120 credits) is delivered online, giving you a strong understanding of the workings of the aviation industry and how to put theory into practice within a real business environment.

Where your career will take you

Upon graduation, you could go on to work as a First Officer, a Flight Instructor, a Senior First Officer, or a Captain.

- Award BSc (Hons)
- Duration Full-time 2 years
- Start date Monthly start dates
- Location Gloucestershire Airport/Online

Entry requirements

Please see page 175

- You will need to pass the assessment requirements for the ATO
- You will need an EASA Class 1 Medical certificate.

Ranked 3rd in England for Tourism, Transport and Travel

BSc (Hons) **Bio-Sciences**

Biological sciences are the study of life, and our wide-ranging BSc (Hons) Bio-Sciences degree will provide you with a comprehensive scientific foundation.

What you will study

You will start by studying a general curriculum that will provide a broad scientific foundation in biomedical science, covering topics such as molecules and cells, fundamentals of evolution, genetics and disease and molecular biology.

You will then have the option to choose a pathway. No matter what your pathway, practical laboratory skills will form an integral part of your studies. The final research project provides an excellent opportunity for you to tailor your research to your own interests, through either laboratory-based or literature-based learning, depending on your chosen pathway.

You can also choose to study a placement year module to develop your employability skillset and enhance professional development and career prospects.

Where your career will take you

Upon graduation, you could go on to work in healthcare, medical research, forensic science, science writing or academia, dentistry, data analysis, informatics, pharmaceutical research, ecology, pathology or biomedical product marketing.

- Award BSc (Hons)
- UCAS Code C991 C992 with Foundation C993 with placement C994 with Foundation and placement
- Duration Full-time 3 years With placement 4 years With Foundation 4 years
- Start date September
- Location West London Campus

Entry requirements

Please see page 175

BSc (Hons) **Biochemistry**

This degree provides you with the tools and knowledge to research and develop solutions for many of the sustainable development challenges that the world faces today.

What you will study

You will learn about the important biological and chemical processes that underpin life from subjects such as biochemistry, microbiology, cell biology and molecular biology. You will also gain insight into key essential processes and pathways within the cell, like gene regulation, enzyme activity, metabolism and more.

You will benefit from being part of a learning community that conducts cutting edge research into areas such as cancer, genomics, microbiology, food safety, ageing and memory and translation medicine, as well as having access to brand-new facilities that include equipment used in modern pharmaceutical, nutritional and clinical

There is also the option of a placement year to develop your employability and career prospects.

Where your career will take you

Upon graduation, you could go on to work in areas such as healthcare, medical research, forensic science, science writing, academia, pharmaceutical research or biomedical product marketing.

BSc (Hons) **Bioinformatics Genomics**

Using a mix of computing, biology and medicine, you will explore the wide-ranging subject matter with an emphasis on practical learning throughout.

What you will study

This course aims to prepare you for work as an independent practitioner and researcher in a wide range of areas, including human health, drugs and therapeutic development, improving the quality of animal, plant and food health, and more.

You will gain detailed knowledge in the scientific underpinnings of the genetic causes of diseases before progressing to develop specialist knowledge and skills. You will study data analysis and modelling in R, learn how to collect and analyse real-life data, gain industrial and clinical skills in our Bioinformatics workstations and simulation suites, as well as develop bioinformatics and genomics techniques.

There is also the option to study a placement year module.

Where your career will take you

Upon graduation, possible careers include working as a bioinformatics scientist, a molecular pathologist, a research scientist, a biostatistician, a microbiologist, a zoologist or wildlife biologist, a biomedical researcher or an agriculturist.

BSc (Hons) **Biological Sciences**

This course covers the key areas of biological sciences, including plant and animal biology, molecular biology, cell biology, microbiology, key aspects of human biology, ecology and conservation.

What you will study

Your practice-based learning will include performing lab and field techniques and procedures, writing academic and industry-relevant reports, undertaking research based on your ideas as part of a team and presenting the outcomes of research at an end-of-year student conference.

You will also write up research papers and proposals and undertake an individual research project in the final year of the course.

Where your career will take you

Upon graduation, you could go on to work as an ecologist, a conservation or animal behaviour specialist, a clinical or laboratory geneticist, a clinical study manager, a genetic counsellor, a computational genomics and data scientist, or a biotechnologist or research scientist.

BA (Hons)

Broadcast and Digital Journalism

Are you looking for a journalism degree that combines studying traditional formats alongside rapidly developing contemporary media?

What you will study

This degree is designed to equip you with the knowledge and experience to apply your skills and understanding of broadcast and online journalism in practical, real-life scenarios.

You will face new and challenging ways of telling stories and reporting events. This reporting could span a range of formats and settings, providing additional context to this interesting area of work. You will create journalistic material for various modules and the News Days that form an integral part of the course.

You will also have the opportunity to gain valuable industrybased work experience, which will give you an insight into the employment opportunities within the sector.

Where your career will take you

Upon graduation, you could go on to work as a researcher, production assistant, regional or international journalist or technical operator.

BSc (Hons) **Building Surveying**

If you want to take advantage of building surveying opportunities in the property development and construction industries, this surveying degree is for you.

What you will study

Taking your building surveying degree at the University of West London puts you close to the heart of the fast-paced London property market. Not only does this provide you with networking opportunities, it can also help you to gain insights into contemporary issues affecting the property and construction industries.

You will learn to appreciate the complex nature of the built environment and the many professions that contribute to it and gain an understanding of diverse topics, from project management principles to law and legislation.

The course will cover contemporary issues, such as sustainable technology and principles, as well as core skills in the observation and analysis of structures.

Where your career will take you

There are a number of areas in the construction industry in which you might seek employment once you graduate. You could go on to work as a building surveyor or property development manager.

- Award BSc (Hons)

FdSc **Building Surveying** (work-based day-release)

Are you interested in a building surveying qualification that lets you work while you study?

What you will study

During this two-year building surveying course, we will take you from basic principles to working on an integrated project in a team.

You will gain valuable skills in building measurement and condition surveying, procurement, CAD and BIM and maintenance management.

The course will also develop your understanding of building pathology, construction law, building technologies and regulations.

Where your career will take you

After successfully completing this course, you can progress to complete the BSc (Hons) Building Surveying course. Once you graduate with your BSc Honours degree, you will be able to pursue a professional career in property development or the construction industry.

- Award FdSc
- Duration Day-release 2 years
- Start date September

BSc (Hons)

Business Economics

Do you want to learn how the global economy affects a business's chances of success?

What you will study

On this course, you will learn about business and economics in a globalised world, study contemporary issues affecting these fields and develop the professional skills you need to embark on a rewarding career.

This is a gateway course, which can launch your career in business economics without the need for a degree in a heavily mathematical subject. You do not need prior knowledge of business or economics to apply.

The course includes a diverse range of modules to help you find your specialism, so you can identify and work towards your career goals. This will allow you to focus on a particular business area once you graduate.

Where your career will take you

Upon graduation, you could start a career in one of the following areas: economic, financial and real estate consultancy, market and business research, marketing or e-commerce.

- Award BSc (Hons)
- UCAS Code LN11 LN10 with Foundation
- Duration Full-time 3 years With Foundation 4 years

BA (Hons) Business Studies with Digital Marketing

Gain the opportunity to develop your perspective on business and digital marketing that will enhance and expand your future careers.

What you will study

This course will introduce you to the customer-centric strategies that enable organisations to integrate management, resourcing and communications into silo-free structures. The course also recognises the requirement for professionals to be able to analyse and evaluate digital marketing campaign performance in the face of active competition and constant changes in consumer purchasing preferences and behaviour.

The course also anticipates the growing demand for professionals to understand how strategies for business growth must also be supported by genuine sustainability and social responsibility.

Where your career will take you

You will gain the knowledge and skills that will help you find a career in organisations that requires professionals in business administration, sales, retail management and many more.

BA (Hons) Business Studies with Entrepreneurship

If you want to launch your own start-up or help a new venture to grow, this business entrepreneurship course will give you the skills and knowledge to do it.

What you will study

Developed in partnership with local business organisations in both the public and private sectors, this entrepreneurship course will help you meet the challenges of building your own business.

We will give you the information, tools, techniques and experience you need to devise creative solutions to the full range of business problems. The knowledge you will gain during this course can help you to start a rewarding career.

Where your career will take you

This degree focuses strongly on entrepreneurship, which is ideal if you want to start your own business. It is also useful for anyone who plans to work in a small-to-medium enterprise (SME).

A Business Studies degree can open the door to careers in a number of interesting areas, both in the UK and abroad, including marketing, finance and sales.

BNursing (Hons)

Children's Nursing (Pre-registration)

This course will enable you to care for children and young people with acute illness, long-term conditions, life-limiting conditions and at the end of their life, in partnership with their parents/carers.

What you will study

This course (equivalent to a BSc Honours in Nursing) will enable you to become a knowledgeable, compassionate and skilled graduate nurse. You will work in partnership with parents/carers to meet the physical and mental health needs of children and young people (newborn up

You will split your time equally between learning theory on campus and applying your knowledge in practice, across a range of healthcare settings, where you will be supported by subject specialists, who will provide you with personalised feedback. Our simulation centres (including virtual reality and immersive rooms) will help you practise your clinical skills in a safe environment. On successful completion of the course you will be eligible to apply to register with the Nursing and Midwifery Council as a Children's Nurse, and will receive an undergraduate honours degree.

Where your career will take you

Our graduate nurses are highly sought after. They secure jobs in NHS Trusts/healthcare organisations, who offer preceptorship programmes and a range of developmental opportunities.

- Award BNursing (Hons)
- UCAS Code B732
- Duration Full-time 3 years
- Start date September

Best modern university in the UK for Civil Engineering The Guardian University Guide 2024

FdEng Civil and Environmental **Engineering (work-based day-release)**

Are you looking for a professionally accredited course in engineering that fits around your work commitments?

What you will study

This course is designed to prepare you for the everchanging needs of the sector. We make sure that contemporary matters, including sustainability, are covered and you will be taught by industry experts at the forefront of the latest research. This access to expertise gives you valuable knowledge of developments relevant to environmental engineers and civil engineers more broadly.

Where your career will take you

By itself, this qualification is on the same level as the Higher National Diploma (HND).

After completing this course successfully, you can progress straight to the final year of our BEng (Hons) Civil and Environmental Engineering.

MEng (Hons) **Civil Engineering (Integrated)**

From safe drinking water to transport systems, civil engineers make a huge impact on the world we live in and our quality of life.

What you will study

This four-year MEng course has been designed to meet the requirements of the accrediting body, the Joint Board of Moderators (JBM).

The degree has a strong focus on current important areas such as sustainability, resilience, and structural engineering, and on research strengths at UWL in climate change and building performance, materials, smart technology and computational modelling.

You will learn about safety legislation, safe working, method statements, risk assessment and management, as well as gaining site experience.

Where your career will take you

MEng graduates typically secure positions with civil engineering contractors, design consultancies, surveying subcontractors, utilities companies, and structural engineering organisations while others decide to work in education.

- Award MEng (Hons)
- UCAS Code H201

BSc (Hons)

Clinical Practice (level 6 only)

This flexible part-time course will enable you, as a healthcare practitioner, to top-up your pre-registration qualification to an honours degree, achieving graduate status.

What you will study

Practitioners who already hold a pre-registration qualification (Diploma or Advanced Diploma) can opt to undertake a generic award, or have the focus of your studies recognised through a variety of badged awards.

If you already hold a DioHE, you will typically complete 80 credits of Level 6 optional modules. This usually equates to four modules.

If you already hold an AdvDip, you will typically complete one 20-credit Level 6 optional module.

If you already hold a DioHE and have completed Level 6 CPD modules with another UK university in the last four years, we may be able to recognise this certified learning. The number of optional module credits you will study with us will depend on the number of credits we are able to recognise and integrate into your course (this will be a maximum of 60 Level 6 credits).

The optional modules you choose will usually reflect your continuing personal and professional needs, along with the area of practice you work in.

Where your career will take you

Once you graduate, you could choose to further your studies in healthcare or a related area.

Institute for Health (Reading)

BMus (Hons)

Composition (Film/Theatre)

This course sits at the heart of London College of Music and represents a creative hub for forward-thinking musical minds.

What you will study

This course offers a balanced spread of practice-based activities, historical-theoretical studies, and industryrelated insights.

Alongside a traditional exploration of compositional practices, the course provides a unique focus on the relationship between music and narrative. This emphasis will allow you to explore music and composition in relation to drama, narration, discourse, images and action; elements that will strengthen and expand your compositional vision and ideas.

The course will also allow you to gain a robust understanding of the dynamics of the creative industries, through modules such as Business Skills for the Music Industry and Promoting Your Career.

Where your career will take you

Upon graduation, you could go on to work in the creative industry as a composer, arranger, orchestrator, editor, copyist or musical director. You could also work in the arts industry or the education industry.

BSc (Hons) **Computer Games Technology**

As a qualified developer, you could find yourself working on games for a wide range of purposes including entertainment, education and business.

What you will study

On this games design course you will develop your knowledge, understanding and practical skills to harness technology and create compelling gaming environments.

From the start, you will gain a good foundation for game development and start building your digital identity and online portfolio.

As you progress, you will enhance your skills in computer graphics and your understanding of how they work. You will also examine specialist topics in computer games technology, including mobile application development and simulation and virtual worlds (GSVW). Your studies in the latter will give you the chance to work on serious games.

Where your career will take you

Once you graduate you could go on to work as a game developer or designer in a variety of businesses here and abroad – from technology start-ups to publishers.

BSc (Hons) **Computer Science**

This computer science degree is designed to meet the high demand for IT graduates with up-to-date knowledge and skills.

What you will study

You will start your computer science course with the fundamentals of computing and software development. During regular laboratory sessions, you will apply what you have learned through hands-on practice.

As you progress, we will introduce the core concepts for producing mobile and business applications. This will give you a good understanding of computer science in a professional context.

Throughout the course, you will also develop the professional skills that will be essential to your future career.

Where your career will take you

Popular careers for computer science degree graduates include interaction designer, software architect and software engineer.

BSc (Hons) **Construction Project Management**

Construction project managers play a vital role, in making sure that a project is procured effectively and efficiently, designed and contracted through a proper tendering process, and delivered safely, on time and within budget.

What you will study

On this course you will learn about various methods and techniques required for successful construction project and site management. The course content is contemporary and emphasises the knowledge and skills you need for sustainable development and construction.

Your studies will cover:

- procurement and tendering method and process management
- project and resource management
- contract administration and risk management
- Computer Aided Design (CAD) and Building Information Modelling (BIM)
- building technology
- building regulations and construction law.

In addition, we will arrange visits to construction sites and the manufacturers of construction materials, which can help you to see how the theories you learn in class apply in the real world.

Where your career will take you

Once you graduate you could work as a construction site management, project support, compliance officer or construction consultant.

FdSc Construction Project Management (work-based day-release)

Construction is a fast-growing industry in the UK, and the need for companies to gain and retain skilled project managers is growing with it.

What you will study

Your FdSc Construction Project Management studies will prepare you to take on a senior role. Through a combination of university- and work-based learning, you will enhance your knowledge and skills in:

- procurement and tendering method and process management
- project and resource management
- contract administration and risk management
- Computer Aided Design (CAD) and Building Information Modelling (BIM)
- building technology
- building regulations and construction law.

We will also provide opportunities to expand your knowledge and your professional network through field trips and seminars.

Where your career will take you

Many graduates go on to high-level management roles within the construction industry. You may choose to follow a career in construction site management or financial management.

- Award FdSc

BA (Hons) Contemporary Theatre and Performance (Applied Acting and Devising)

This practice-focused course aims to equip you with the skills needed to be an innovator, performer and theatre-maker in the contemporary performing arts industry.

What you will study

Taught mostly through practical activities, you will learn skills in performing, creating, facilitating and producing your own performance projects. The modules are designed to nurture your creative potential and artistic identity, exploring practices from a wide range of global and local practices.

Across the modules, acting, movement and voice classes will be blended with contemporary practices such as sitespecific and immersive performance. You will learn how to use film and audio technologies to stage performances in digital spaces and platforms. You will also learn how to apply these performance skills to working with communities and exploring current social issues.

Where your career will take you

The strong employability focus in this course will prepare you for a range of careers within the wider arts industry, from performing or directing to setting up your own arts organisation or working in education or cultural heritage.

3rd in London for Drama and Dance The Guardian University Guide 2024

BA (Hons)

Content, Media and Film Production

Offered in partnership with MetFilm School, this course will set you on the path for a career in the world of film and media production.

What you will study

This course will challenge you to produce branded content, viral videos, fictional TV series and social impact films. You will learn about the skills required for navigating the modern media environment, such as digital literacy, social media analytics and creative entrepreneurship.

Each semester, you will work with an industry partner to create a specific piece of film, TV or content in line with an industry-standard brief. So far, students have created work for industry partners including X (formally Twitter), TikTok, YouTube and Amazon Studios, Your finished work will then be screened at the end of the module.

Course content is divided into three main creative areas. In the first, you will look at the relationship between a production and its audience. In the second, the focus will be on practical and core skills, while the third looks at production.

Where your career will take you

Upon graduation, you could go on to work as an editorial assistant, broadcast engineer, broadcast journalist, content producer, researcher, digital editor or postproduction executive.

BSc (Hons) **Cyber Security**

As more people spend more time online, the amount of data they generate grows. If organisations and companies do not have secure information systems then data could get into the wrong hands, with potentially dangerous results.

What you will study

Cyber security is essentially about the protection of information and information systems. On this course, you will learn how to perform this protective role, exploring different security technologies and studying management processes and control systems.

Our partnership with Amazon Web Services Academy means you will be exposed to new security technologies and solutions. This will help you to gain valuable skills that you can use both during the course and after graduation.

Where your career will take you

Cyber Security graduates generally have a good record of finding employment and progressing in their profession. Popular roles for BSc Cyber Security graduates include network or computer security technician, computer or network security officer and identity and access management officer.

BSc (Hons) **E-Sports Management** with Event Production*

This is an innovative and comprehensive programme designed to immerse students in the dynamic world of E-Sports management.

What you will study

This interdisciplinary course integrates theoretical frameworks with practical applications. The curriculum emphasises strategic decision-making, financial literacy and talent management, preparing you for leadership roles in the E-Sports industry. Through modules like 'E-Sports in Context', you will critically analyse the cultural, social and economic dimensions of E-Sports, fostering a holistic understanding of the field.

The course's unique focus on event production, risk management and ethical considerations sets it apart, ensuring students are well-equipped to navigate the complex and fast-evolving landscape of E-Sports. Graduates emerge with a deep understanding of contemporary issues, honed strategic skills and the ability to contribute meaningfully to the E-Sports industry. Join us on this exciting journey, where theory meets practice and students are empowered to shape the future of E-Sports management.

Where your career will take you

Upon graduation, you could work within E-Sports event management, E-Sports production, or other E-Sports roles outside of the events sphere, such as team management, marketing and communications, content creation or data analysis.

BEng (Hons) **Electrical and Electronic Engineering**

Electrical and electronic engineering touches on almost every aspect of modern life, from communications to electrical power distribution and health care

What you will study

On this electrical and electronic engineering degree, we will teach you how to produce practical and innovative solutions to a variety of engineering problems.

From day one you will be developing electronic circuits, from prototype design through to fully assembled PCBs (printed circuit boards).

This course is accredited by the Institution of Engineering and Technology (IET) with Partial Chartered Engineering status (Partial CEng). However, please note that our 1-year top-up course is not accredited by the Institution of Engineering and Technology.

Where your career will take you

Popular jobs for electrical engineering degree graduates include electronic engineer, electrical engineer or software engineer.

- Award BEng (Hons)
- UCAS Code H660 S630 with Foundation R123 with Top-up

BA (Hons) **Electronic Music Production**

This course is carefully structured to recognise and nurture your unique artistic identity, allowing you to develop and grow as a composer, performer and freelance producer.

What you will study

This course is a journey of artistic development and musical creativity in which you will learn to harness and master hardware and software instruments to develop and perfect your productions.

Through theory and practical studies, you will come to consider electronic music as not a single genre but as a way of making music that can be applied to a multitude of styles.

You will start by establishing fundamental theories and skills, culminating with the release of your first track. You will then take a deeper look into the history and genres of electronic music, exposing you to new compositional techniques, and the chance to deliver your first live performance. You will complete your studies with an ambitious and exciting project of your own design.

Where your career will take you

Upon graduation, you could go on to work as a music artist/performer, music producer, DJ, studio recording engineer, audio-visual artist, sound artist or sound designer.

BA (Hons) **English and Media and Communications**

Are you looking for a course that combines your passion for English literature with the technical skills required to make it in media and communications?

What you will study

On this joint honours course, you will acquire the theoretical, practical and communication skills required to forge a successful career in the media industry.

The course is designed to give you knowledge of forms and genres of English literature from a range of periods, as well as the ability to analyse and interpret complex works of literature and to develop your own critical voice. You will also study issues and themes in contemporary media and acquire sought-after digital media skills.

You will also gain practical skills and knowledge in digital production, post-production and industrial contexts, and will examine a variety of critical perspectives and analytical methods specific to your two areas of study. During your second year (Level 5), you have the option to complete a placement related to your core literary interests or in the subject area you are combining with English in your degree.

BA (Hons) **Fashion and Textiles**

Develop your own design voice, as well as the technical expertise and knowledge to enable you to compete globally within print, knit and fashion.

What you will study

We help you build confidence and presentation skills and provide an insight into how the fashion world functions commercially and the qualities required to survive in this competitive sector.

You will experiment with all aspects of fashion and textile design. At the end of your first year, you will choose a direction for the rest of your course: fashion print or fashion knit.

To help develop your creative voice, you will work on personal design briefs, as well as designing for the market. Competitions, educational visits, quest lectures and design projects will bring what you study to life. In addition, we will support you in finding a work placement that provides relevant experience for your future career.

Where your career will take you

Upon graduation, you could go on to work in roles such as a fashion, knitwear, print, accessories or textile designer, materials developer, pattern cutter, garment technologist, trend forecaster, stylist, buyer or visual merchandiser.

3rd in London for Fashion The Guardian University Guide 2024

BA (Hons) Film and Screen Business

Offered in partnership with MetFilm School, this course challenges you to embrace current narrative and production techniques for screen and television.

What you will study

This course will cover emerging trends and key business skills which you will then use to develop high-level business plans and strategies. You will learn to navigate the modern media environment, film and media content production and delivery, financing and funding, data and analytics, legal and accounting principles, marketing strategy, exploitation and distribution.

You will also hone skills to help progress in your own business career – presentation, networking, pitching and creative entrepreneurship.

Each semester consists of a parallel programme of learning business skills, linked to a challenge for you to develop a business plan or project, as well as being linked to a business or commercial body that specialises in the relevant aspect of business intelligence being studied.

Where your career will take you

Upon graduation, you will have gained a wide range of skills and knowledge to help you pursue a career in film and television.

- Award BA (Hons)
- UCAS Code W3N2 W3N1 with Foundation
- Duration Full-time 3 years With Foundation 4 years

BA (Hons) Food Business Management (Top-up)

Make the world truly your oyster and enhance your career opportunities in the food industry with this BA (Hons) Food Business Management (Top-up) degree.

What you will study

This top-up course prepares you for further career progression into senior roles which require proven skills and knowledge of business, financial and vocation-specific skills of Food service businesses.

It is designed to encourage interactive learning. You will develop your problem-solving and managerial skills as well as your understanding of the theories and concepts that support them. Taking a hands-on approach, our professionally qualified tutors will help you to explore current food production concepts.

Where your career will take you

Upon graduation, you could go on to work in areas such as the cost sector, contract catering, fine or casual dining, or food product development.

- Award BA (Hons)
- UCAS Code D605
- Duration
 Part-time 18 months
- Start date
 September
- Location West London Campus

Entry requirements

You will need:

• Level 5 qualifications to include either music or business.

You can still be considered even if you do not have a formal academic qualification if you have relevant work/industry experience in accordance with the University's accreditation of prior learning policy.

BSc (Hons)

Forensic Science

This course will develop your knowledge of biological and chemical sciences in order to support crime scene investigations.

What you will study

This Forensic Science degree gives you the exciting opportunity to develop a valuable specialism. Throughout the course, we emphasise the practical application of what you will learn in your theory modules.

Our advanced facilities and equipment are integral parts of the course. Here you will apply scientific theories and evidence-gathering techniques in practical contexts — both in crime scene rooms and a laboratory.

You will also develop your analytical skills for assessing blood spatter, DNA evidence and the investigative process.

Where your career will take you

Once you graduate, you could go on to specialise in a particular area of forensic science, such as a reporting officer, crime scene investigator, scientist, fingerprint expert, imaging specialist, fire investigator, lab operative, or ballistic expert.

BA (Hons) **Graphic Design**(Visual Communication and Illustration)

Do you want to make your individual mark in the design world? We will help you to become a standout designer in the exciting world of modern visual communications.

What you will study

This course focuses on the practice and application of graphic design in all its forms. The practical skills you develop will be supported by theoretical and contextual studies of graphic design in history and culture.

Although the course is underpinned by traditional and established graphic design processes and principles, it also proactively embraces the future of design. This means you will cover a broad range of study areas, including typography, editorial design, illustration, 3D design, motion graphics, animation and interaction design. After all, everything is graphic design.

You will have access to a variety of specialist equipment, including computer labs and digital print, photography and video studios. Through studio-based work, you will develop the skills and competencies to become a capable professional.

Where your career will take you

Upon graduation, you could go on to work within graphic design studios, interdisciplinary consultancies, publishing houses, advertising agencies, film and TV, video games or you could go freelance.

BSc (Hons) **Human Biology**

This degree is designed to develop your knowledge and skills for the purposes of testing, analysing and researching the fundamental aspects of what makes us human.

What you will study

You will begin by immersing yourself in the fundamentals of biological science, before having increasing flexibility to follow your own specialist interests as the course progresses. As well as acquiring and fine-tuning your technical, lab and research abilities, an emphasis on data analysis gives you the opportunity to develop programming, modelling and machine learning skills.

There will be a strong focus on aspects such as the fundamentals of human biology, biostatistics and experimental design, learning how to analyse big data using bioinformatics tools, and DNA sequencing, proteomics, metabolomics, microscopy and spectroscopy.

There is the option to study a placement year module to develop your employability skillset and enhance professional development and career prospects.

Where your career will take you

This degree will open a wide range of opportunities including roles in the health sector, research, and clinical trials, and the possibility of further postgraduate study in medicine and related areas.

LLB (Hons) Law

We aim to give you a well-rounded education in all aspects of the law.

What you will study

The LLB Law course is the first step towards obtaining the knowledge to embark on the professional qualifications to become either a solicitor or barrister.

Our law degree lets you focus on applying knowledge in practice, using real-world legal scenarios. All modules are taught with reference to current legal practice, in order to keep you up to date with ongoing changes in the profession. As you work towards attaining your LLB degree, you will develop a thorough understanding of the complexities of the legal system and enhance key skills to help you navigate your new career.

You will also have the chance to learn from the wisdom and experience of leading guest speakers, including academics, barristers, judges and solicitors.

Where your career will take you

Upon graduation, you could go on to work as a barrister, a chartered legal executive (England and Wales), a paralegal or a solicitor. You may also go on to consider a career in the civil service, local government, prosecution service, prison service, probation service, business, politics, police or non-governmental organisations.

BNursing (Hons) **Learning Disabilities Nursing (Pre-registration)**

This course will prepare you to positively contribute to the health and wellbeing of people with learning disabilities.

What you will study

This course (equivalent to a BSc Honours in Nursing) will enable you to become a knowledgeable, compassionate and skilled graduate nurse. You will learn to care for and empower people of different ages, backgrounds, cultures and beliefs with complex mental, physical, cognitive or behavioural care needs.

You will split your time equally between learning theory on campus and applying your knowledge in practice, across a range of healthcare settings, where you will be supported by subject specialists, who will provide you with personalised feedback. Our simulation centres (including virtual reality and immersive rooms) will help you practise your clinical skills in a safe environment. On successful completion of the course you will be eligible to apply to register with the Nursing and Midwifery Council as a Learning Disabilities Nurse, and will receive an undergraduate honours degree.

Where your career will take you

Many of our Learning Disabilities Nursing graduates develop careers as specialist nurses with local NHS Trusts or healthcare organisations.

BSc (Hons)

Mathematics and Computing

This BSc (Hons) Mathematics and Computing brings together subjects from mathematics, statistics, and computing to address the current and future main challenges faced in business, society, engineering, and science.

What you will study

Throughout your studies, you will be introduced to mathematical, statistical, and computing techniques that form the basis of many tools used in industry, engineering, business, and education.

In particular, you will have finely-tuned skills in using information and data as an integral part of problemsolving and decision-making.

More specifically, the BSc (Hons) Mathematics and Computing course will enable you to be highly numerate and able to use this in applications in computing and numerical modelling. It will also teach you to become an independent learner, able to acquire new skills and continue to build your knowledge to adapt to a rapidly changing job market.

Where your career will take you

Graduate employment rates for students with a degree in computer science or mathematics are very high. Some of the top graduate destinations are the IT industry, the financial and insurance sectors, scientific and technical professions or the educational sector.

BSc (Hons) **Mathematics and Statistics**

The world of work is increasingly reliant on science, technology, engineering and mathematics (STEM) skills and this Mathematics and Statistics degree is a trusted and relevant qualification designed to meet employers' needs for skilled STEM graduates.

What you will study

Professional organisations are keen to hire graduate mathematicians to help them analyse problems, formulate questions and find solutions, and there is a multitude of business applications with which to utilise the skills you will develop on this mathematics degree.

Throughout this mathematics degree, you will acquire a broad understanding of mathematics and its applications.

With the support of software to enhance your learning experience, you will learn how to apply mathematical and statistical techniques to tackle realistic problems, evaluate the outcomes, and interpret the results to build your own bank of knowledge.

Where your career will take you

Once you graduate, you could go on to have a successful mathematics career with organisations that deal with fiscal analysis and prediction, meteorology and environmental science.

BA (Hons)

Media and Communications

This dynamic course allows you to choose your own specialisation from a diverse range of options, all taught by experts in their fields.

What you will study

The curriculum is organised around unifying blocks. In each semester, you can focus on developing your craft and critical skills on a specific theme/format, without feeling dispersed among many unrelated assessments.

The course features two customisable pathways – halfway through your studies, you have the opportunity to choose either the Media Production strand or the Media Studies strand.

Real industry work experience is guaranteed. Whatever the pathway you choose, there is a minimum of 40 hours of industry work placement, facilitated by the School's Placements Team.

Where your career will take you

Upon graduation, you could go on to work in film, television, radio, advertising, journalism, public relations, literary agencies or publishing.

BMidwifery (Hons) Midwifery (Pre-registration)

This course will equip you, the next generation of midwives, with the knowledge, skills and values to deliver world-class, evidence-based care for women, newborn infants and their families

What you will study

You will gain a sound understanding of the role of the midwife and the foundations of midwifery care. As you progress through the course, you will develop and apply your knowledge to a variety of contexts.

You will spend an equal amount of time in blocks of theory and clinical practice. The theoretical element of the course is delivered through an exciting range of teaching and learning approaches; including online and face-to-face lectures, group tutorials, one-to-one learning opportunities, classroom activities, practical skills, simulation-based learning, online and guided independent study.

Where your career will take you

On completion of the course, you will be eligible to apply to register with the Nursing and Midwifery Council as a Midwife.

BMidwifery (Hons) degree course is an equivalent qualification to a BSc (Hons) or a BA (Hons) degree course.

As a mark of our professional excellence, UWL holds the prestigious Gold Award accreditation by the Unicef UK Baby Friendly Initiative.

BA (Hons) Music Management

Set the stage for a rewarding career in the music business and be a part of a thrilling, fast-paced industry with global appeal.

What you will study

The degree establishes a core understanding of how and why the music business operates and builds on this knowledge with a strong focus on new and creative marketing concepts.

You will spend your first year gaining an understanding of the pre-release supply chain, the live music industry and basic copyright/contract law. After gaining a working knowledge of the business, you will be educated about the principles of music publishing, as well as pre and post-release strategies.

This programme is dual accredited by the Chartered Management Institute (CMI). Students who successfully complete and pass all mapped modules will be eligible for a L5 Certificate in Management and Leadership.

Where your career will take you

Upon graduation, areas you could go on to work in include artist management, booking agencies, PR and press, publishing, record labels, event and tour managing or collection societies.

BMus (Hons) Music Performance

This dynamic and stimulating course is designed for classical or jazz instrumentalists and singers who want to work professionally in the music industry.

What you will study

This course will help you develop the skills, knowledge, and confidence you need to become a professional classical or jazz musician at the highest level.

You will be coached, through individual lessons, on your main instrument or vocal study in classical or jazz styles, although there are many opportunities to cross over genres and styles. You will develop flexible musicianship skills as you explore new techniques.

Throughout your studies, you will be given opportunities to perform, both as a soloist and as an ensemble musician. Alongside these practical elements, you will have the opportunity to study music history and music management, and to develop your analytical and critical abilities.

Where your career will take you

Upon graduation, you could go on to work as a musician, as a member of a choir or opera company, as a conductor or composer, as a music teacher or as a music entrepreneur or festival artistic director.

BA (Hons) **Music Technology**

This specialist course offers you the chance to apply music technology in creative ways using professional equipment and software.

What you will study

On this music technology specialist course, your focus will be in production and recording. You will acquire and develop the skills you need to work with contemporary sound and music, both pre and postproduction. In addition, you will learn the techniques that are essential for creating music and audio to a professional standard.

You will explore the fascinating areas of music production, mixing, composing, sound design, game audio, audio postproduction, surround mixing, live sound and experimental sound art. We will help you hone your business survival skills and production and release strategies.

This course caters to those looking to learn a wide variety of music technology skills with specialised focus in the final year. Collaboration is an integral part of the course, with opportunities to join forces with film, gaming and media students across our Schools.

Where your career will take you

Upon graduation, you could go on to work as a record producer, a media composer, or to work in areas such as audio post-production and sound for games.

BA (Hons)

Musical Theatre

Step out into the spotlight with this musical theatre course featuring a stellar cast of professionals, industry interaction and an immersive experience.

What you will study

This course equips you with the skills and experiences necessary to thrive in the Musical Theatre industry today. Our seasoned instructors, who are working performers and creatives with first-hand industry knowledge, will guide you in honing your performance skills, while helping you develop your identity as an artist and finding your creative voice.

At Level 5, you will develop a Children's Theatre piece that tours primary schools, followed by the creation of your own cabaret act, performed as part of the LCM Cabaret Festival. At Level 6, you will perform in productions, shows, a filmed showcase and will develop new writing. This will be complemented by the pursuit of the Licentiate of the London College of Music aualification.

There is a strong emphasis on empowering you to create your own work, ensuring that you graduate feeling empowered to take control of your career.

Where your career will take you

Upon graduation, you could go on to work in areas including musical theatre, cabaret, film, TV, community theatre or theatre in education.

MSci Nursing Dual Field (Adult and Mental Health) (Pre-registration)

You will study two fields of Nursing over four years; Adult and Mental Health, boosting your career prospects.

What you will study

This course (equivalent to a Masters in Nursing) will enable you to become a knowledgeable, compassionate and skilled graduate nurse across two fields of nursing; Adult and Mental Health.

You will split your time equally between learning theory on campus and applying your knowledge in practice, across a range of healthcare settings, where you will be supported by subject specialists, who will provide you with personalised feedback. Our simulation centres (including virtual reality and immersive rooms) will help you practise your clinical skills in a safe environment.

Where your career will take you

As a successful graduate you will be eligible to apply to register with the NMC as an Adult and Mental Health Nurse. Many of our graduates find work with local NHS Trusts or healthcare organisations.

- Award MSci
- UCAS Code B791
- Duration Full-time 4 years
- Start date September

BSc (Hons)

Nutrition and Food Management

Our knowledge and understanding of food and nutrition is constantly evolving, making it one of the most diverse and interesting areas to work in today.

What you will study

In this course you will cover a variety of key topics relating to nutrition, as well as gaining the technical, operational and managerial skills you need to meet the current demands of businesses in the food management sector.

Throughout your studies you will have access to food entrepreneurs and industry professionals who are part of the West London Food Innovation Lab Network. On top of this, you will use a knowledge base that we have developed with the Institute of Food Science and Technology.

The final year dissertation project will give you the opportunity to develop a professionally presented piece of work that demonstrates your abilities in critical thinking. There is also the option to take this course with a work placement of 40 weeks after Level 5.

Where your career will take you

Upon graduation, you could go on to work in roles such as a nutritionist, public health adviser, educator, wellbeing coach, researcher, food and health writer, or in food product development.

BSc (Hons) **Nutritional Therapy**

This course will help you develop theoretical and practical knowledge of nutritional therapy, all underpinned by biochemical sciences and the functional medicine approach.

What you will study

This flexible course is designed to fit around your other commitments. It combines online distance learning with elements of clinical practice in your final year.

This course will give you a comprehensive understanding of the role of diet and nutrition in maintaining health and wellbeing. You will develop your research and analytical skills while learning about the role of Nutritional Therapy within the field of Integrated Medicine.

Where your career will take you

When you complete your studies, you can apply for registration with the Complementary and Natural Health Care Council (CNHC) as a registered Nutritional Therapist.

You will also be able to become a full member of the British Association of Nutrition and Lifestyle Medicine (BANT), which will enable you to practice as a Nutritional Therapist in the UK.

- Award BSc (Hons)
- UCAS Code P026
- Duration
 Supported distance learning with study days 5 years

BSc (Hons) **Operating Department Practice (Pre Registration)**

This ODP course will train you to become a competent, reflective Operating Department Practitioner (ODP), able to provide high standards of compassionate patient care during the anaesthetic, surgical and post-anaesthetic recovery phases of the perioperative journey.

What you will study

ODPs are skilled healthcare professionals and part of the multidisciplinary perioperative team alongside surgeons, anaesthetists and theatre nurses, carrying out complex clinical procedures.

This course will prepare you to assess, manage and evaluate the physical and psychological needs of patients of all ages during the perioperative period. Your clinical skills and development will be supported by an industry-standard simulation centre within the University. You will also spend time on a placement in clinical practice, where you will gain valuable experience in real situations.

Where your career will take you

After completing the course successfully, you will be eligible to apply for registration with the Health and Care Professions Council (HCPC). You could go on to work in anaesthetics, surgery or recovery, or leadership/management roles.

Performance and Music Management

Are you a performing musician who also has an interest in learning about the global music business?

What you will study

This course has a balance of professional and practical skills development, with a focus on areas such as solo and ensemble performance, songwriting, arranging, management and promotion and the music industry. The knowledge gained in these areas will empower you with the necessary skills to develop as a pragmatic, wellinformed creative entrepreneur.

The degree establishes core understanding of how and why the music business operates and builds on this knowledge with a strong focus on new and creative marketing concepts. This management foundation pairs with a comprehensive performance curriculum, which has been designed to foster new modes of content creation and live music performance skills.

Where your career will take you

Upon graduation, you could go on to work in a variety of areas, including music performance, branding, marketing, or promotion. The course also provides performing musicians with the skills to be able to manage their own careers.

Performance and Recording

Would you like to increase your versatility as a recording artist? Are you a musician who wants to become a music producer?

What you will study

Through a unique fusion of performance and recording skills, this degree recognises that modern recording artists require a solid technical foundation, a high level of performing ability, a knowledge of musical concepts and a strong creative drive. This course will teach what it means to be a studio engineer, a self-promoter, a songwriter and arranger and an accomplished manager of your career aspirations.

As a performer, the course will broaden your perspective on what it means to perform in the future, using practical and technologically-enhanced performance techniques. Using your performance skills, you will also explore the craft of recording and production as both an art form and as an employable skill.

Where your career will take you

Upon graduation, you could go on to work in a variety of areas, such as solo or ensemble performance, songwriting, arranging, studio engineering, or production.

BSc (Hons) **Pharmacology**

If you want to be involved in the areas of drug research, testing and development then pharmacology could be the course for you.

What you will study

This course will start by providing you with a thorough understanding of the scientific basis of pharmacology in biochemistry, genetics and immunology. You will learn practical laboratory skills while gaining an overall picture of the human organism and its essential functions.

Following from this, you will learn more about the action of drugs on their target sites and the action of the body on drugs once administered. You will become familiar with the principles of laboratory and practical methods. For your final studies, you will independently pursue a research project allowing you to explore a topic of interest.

You can also choose to add an optional placement year.

Where your career will take you

Upon graduation, you could go on to work in pharmaceutical science or research, healthcare, medical research, academia, biomedical research, finance and business, medical sales and marketing, dentistry, science or veterinary pharmacology.

BA (Hons) **Photography**

Are you looking for a photography degree that will help you develop your own individual style behind the camera and put you on a path towards a creative career?

What you will study

On this course, you will produce creative work which combines a strong conceptual and aesthetic approach with high technical quality.

You will experience many different aspects of photography and acquire a solid overall grounding in the medium. Recent workshop activities have included working with a walk-in camera, using alternative analogue processes, working with high-end digital capture and output and making handmade photo books.

We offer a wide range of photographic facilities, including well-equipped studio space, an analogue darkroom, photographic equipment hire and high-end scanning and digital printing. To study this course, you need to have personal access to a computer and digital SLR camera.

Where your career will take you

Upon graduation, you could go on to work as a photographer, retoucher, picture editor or researcher, as well as working across industries such as advertising, fashion, photojournalism, web content production, art buying or exhibition curation.

BSc (Hons) **Sociology**

This Sociology course will explore the ways in which society is changing, and the impact that these changes have on individuals and communities.

What you will study

At its core, the BA Sociology degree incorporates the unifying themes of decolonisation and social justice throughout the course.

This course will have the following distinct features. Firstly, a focus on ethical, applied social research practice, creating practitioners who are aware of diversity issues, sustainability concerns and the complex social environment. Overall, this course is designed to help students gain a deeper understanding of contemporary society and the various factors that shape it, taking account of the significance of the globalised digital age.

Where your career will take you

The demand for graduates with combined skills in research methods, social research and issues around diversity and inclusion is high across a range of public and private employers. Potential career fields include government, public sector, social enterprises, financial services industries and business.

BA (Hons)

Sound and Music for Gaming

Our degree aims to inspire you to become an innovative and creative professional within the rewarding world of sound and music for gaming.

What you will study

This course offers a solid grounding in sound and music production with middleware and DAW implementation, creative sound design, music for gaming, recording studio and surround mixing production skills.

The course modules are designed to nurture your creative potential and individual artistic identity. The course has been designed from the ground up, using industry input to prepare you with the skillset (and mindset) to succeed in this industry.

You will also benefit from tutors who are industry practitioners and have designed BAFTA/Cannes Lion Award/Apple Top Ten award-winning game audio.

Where your career will take you

Upon graduation, you could go on to work as a composer, sound designer, mix engineer, mixer/producer, studio professional, or in audio post-production.

BSc (Hons) **Sound Engineering**

Launch a dynamic career in sound engineering, blending hands-on vocational training with in-depth academic study in cutting-edge sound technology and techniques.

What you will study

Immerse in the fundamentals of sound engineering, covering key concepts in acoustics, studio recording, audio electronics and digital audio processing. Practical workshops and hands-on studio sessions are integral, providing real-world experience.

Explore advanced topics such as live sound reinforcement, sound design for various media, and advanced digital audio production. Emphasis will be on applying theoretical knowledge to real-world scenarios, with opportunities for collaborative projects and industry engagement.

The course culminates with a final major project that demonstrates your technical and creative expertise, preparing you for a career in the diverse field of sound engineering.

Where your career will take you

Once you graduate you are well-prepared for diverse roles such as recording and live sound engineer, acoustician, and digital audio programmer, with potential employment in music, film and TV production, live event production, software development, and more.

BSc (Hons) Visual Effects (VFX)

Would you like to join the UK's fastest-growing economy? This practical and stimulating degree will give you direct exposure to VFX roles and career opportunities.

What you will study

Based in London, the centre of the UK's creative industries, this innovative course places you at the heart of the action. It aims to give you a dynamic, contemporary and hands-on experience as you learn to work with advanced materials and techniques.

The course has been designed with input from some of the leading effects facilities, including DNeg, and developed with advice and guidelines from the professional body Creative Skillset.

You will learn how to make your work both imaginative and realistic, using professional software, equipment and tools, and will have excellent technical resources at your disposal.

Where your career will take you

Upon graduation, you could go on to work in a wide range of roles, including roto artist, compositor, texture artist, 3D generalist, animator, visualiser, games artist or modeller.

(a) courses@uwl.ac.uk

Entry requirements exist as a guide to the level of education required to study on each course. We will decide if your qualifications meet these requirements when we consider your application.

It is important to realise that our decision will be based on your overall suitability for the course and not only on whether you meet the minimum entry requirements.

You can find out which entry requirements apply to the course that you are considering by checking the relevant course listing in this prospectus. If you are an international student, please also view our country equivalence guidelines at www.uwl.ac.uk/international.

UCAS Tariff

Offers to our courses are made in conjunction with the UCAS Tariff. The UCAS Tariff is a point-based system used to report achievement required for entry to higher education in a numerical format.

It establishes agreed comparability between different types of qualifications and provides comparisons between applicants with different types and volumes of achievement. A table showing the numerical points awarded for all of the various UK qualifications is available on the UCAS website at www.ucas.com.

Most of our courses require a Level 3 qualification. The following is a list of some of the UCAS Tariff-bearing qualifications that are acceptable for entry on their own, or in combination with other qualifications. For the full listing and tariff point tables please refer to www.ucas.com.

- A Levels
- Access to HE Diploma
- BTEC qualifications (including Nationals, Extended Diploma)
- CACHE qualifications

- Cambridge International Pre-U Diploma
- Cambridge Technicals
- Extended Project
- International Baccalaureate
- Irish Leaving Certificate
- Scottish Advanced Higher
- Scottish Higher
- T Levels
- UAL Diplomas
- Welsh Baccalaureate.

A wide variety of qualifications not currently in the UCAS Tariff are also considered. If you are studying a non-tariff bearing qualification we advise that you contact our Admissions Team on +44 (0)20 8231 2220 or e-mail undergraduate.admissions @uwl.ac.uk so they can clarify whether your qualification is acceptable for entry onto your chosen course.

Auditions

All performance courses require an audition. You will be sent further information about audition requirements when applying. Auditions may take place on site or virtually.

There is also an audition guide available on our website.

Interviews

You may be invited for an interview before an offer is made. This could be the normal practice for that particular course, or it could be because your application is non-standard in some way and the University wants to check that it is the right course for you. You may be interviewed individually or as part of a group. Interviews may take place on campus or virtually.

Portfolios

Some courses require you to submit a portfolio or attend an 'interview with a portfolio'. A portfolio should consist of a collection of work and is used to demonstrate the creative and technical skills that you will bring to the course. The collection of work should demonstrate a breadth of skills appropriate to the chosen course.

Normally, we would expect the portfolio to contain several pieces of work, which ideally should show a variety of skills developed over time. It is often useful to include evidence of the progression of creative thought and the development of technical skills. There is a portfolio quide on our website.

Transferring to UWL from a different university

If you are currently studying at another university and would like to transfer to UWL, you will be pleased to know that many of our undergraduate courses accept students into the second and third years. This is called advanced

standing. A student's eligibility for advanced standing will be assessed by our academic staff on an individual basis as detailed in the "Accreditation of prior learning" section below.

If you wish to transfer onto a fulltime course at UWL in September you need to apply through UCAS. For part-time study, or if you would like to start a full-time course at UWL in spring, you should apply online directly.

Accreditation of prior learning

At UWL we value the experience you have gained through prior qualifications, learning and work. Your prior learning (certificates and/ or work experience) may qualify as credit and award you Advanced Standing. This means you could get exemption(s) from part of your chosen course or start at a higher level than the normal entry point.

How to get accreditation

We assess your past experience and/or qualifications to see if they can count towards the course you plan to study. You can apply for academic credit if you have:

- Relevant work or voluntary experience
- Passed a credit-rated module at a college or university
- Have a professional qualification
- Participated in other courses or training.

Advantages of accreditation

- Reduces the time of study
- Gains recognition for your prior work and learning experience
- Avoids repetition of learning
- Make financial savings.

Types of accreditation

Recognition of Prior Learning (RPL) is the general term used for accreditation activities, whether based on prior certificated learning or prior experiential learning. There are five ways to get RPL:

Recognition of Prior Certificated Learning

Recognition of Prior Certificated Learning (RPCL) looks at your prior studies and professional qualifications to see if these can exempt you from certain modules on the course you wish to study.

2. Recognition of Prior Experiential Learning

Recognition of Prior Experiential Learning (RPEL) is a process for assessing work experience in the field of your studies for credit on your course. You must compile a portfolio of evidence to show how your work experience has covered the learning requirements for a course module. You can combine credit for learning (RPCL) and credit for learning from experience (RPEL) to start your course at a higher level. Your Course Leader will be able to discuss the RPEL module requirements with you; you may need to start this process before the start of your course.

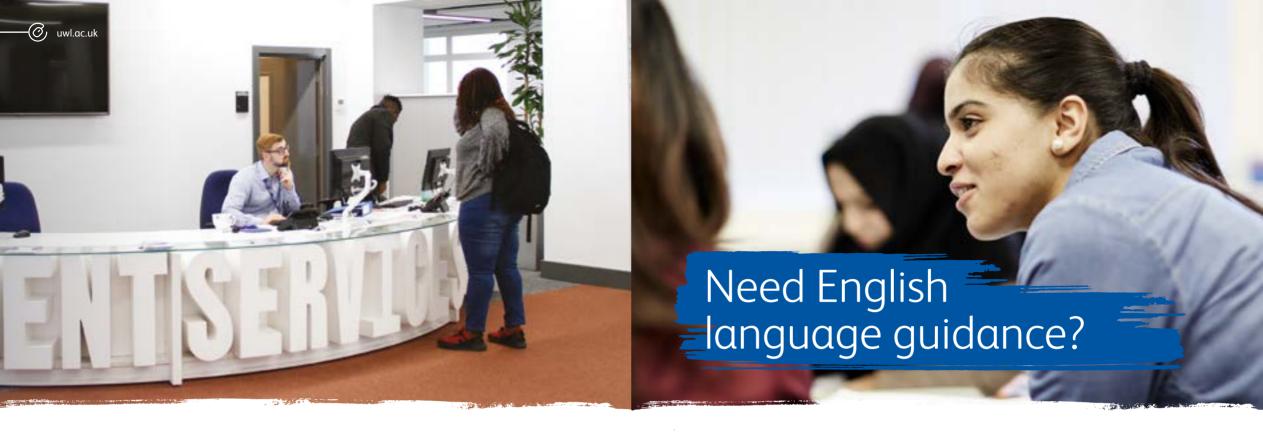

3. External Accreditation

External Accreditation is the credit rating of courses run by external training organisations. It is a credit recognition of learning achieved outside university awards.

Assessments of work produced by an employee in accredited organisations are marked by the organisation; moderated by University staff and reviewed by external examiners, prior to being ratified at assessment board. UWL has built partnerships with a number of organisations and has over 30 external accreditation modules that you can enrol on in addition to, or in conjunction with your studies.

4. Articulation Agreement

Articulation Agreements are for students who have studied a particular course at another institution, guaranteeing entry at a later stage of a designated UWL course.

5. Progression Agreement

Progression Agreements are for students who have studied a particular course at another institution, allowing you to apply for entry to a later stage of a designated UWL course.

Contact our Admissions Team on +44 (0)20 8231 2220 or e-mail undergraduate.admissions @uwl.ac.uk if you would like to enquire about accreditation of prior learning.

Equality and diversity

We are committed to providing equality of opportunity to all students and promote a culture of respect. We also value individual difference with regards to any protected characteristics, eg age, disability, gender reassignment, marriage and civil partnership, pregnancy and maternity, race, religion and belief and sex.

All applications are considered on academic grounds only. We welcome applications from all students. More information can be found at www.uwl.ac.uk/equalitydiversity.

Sharing your disability

The University of West London is committed to supporting students with disabilities, ensuring that they have appropriate reasonable adjustments in place to ensure any barrier to access of their education and potential is removed. This is not to give you an unfair advantage but to create an equal playing field and equality of opportunity.

We encourage you to share any disability as soon as possible to the University so that we can provide you the appropriate support. Once you have informed the University, our Wellbeing Team will contact you and provide further information on

how to access support, should you wish to do so. Information about your disability is treated with the strictest confidentiality and you will be asked to sign a consent agreement with the Wellbeing Team to inform the University of who we can and cannot share vour sensitive information with so that you remain in control. All applications are considered on academic grounds only and you won't be discriminated against by sharing information about your disability. Further information can be found at www.uwl.ac.uk/ disability-support.

If English is not your first language, or if your previous education was in another language, you'll need to provide documented evidence of your English competence.

We accept a variety of English language tests, including International English Language Testing Systems (IELTS). The standard IELTS requirements are 6.0 overall, with a minimum of 5.5 in each element (Reading, Listening, Speaking and Writing). Other English language examinations will be considered at a level comparable to IELTS 6.0.

If you are a student from a majority English speaking country you may not need to take an additional English language test and we may accept your general qualifications.

Pre-sessional English language courses

If you have not met the English language requirement to study an undergraduate degree with us, you may be eligible for one of our pre-sessional English language courses. For pre-sessional English courses, please note that international applicants will be required to have a SELT (UKVI academic IELTS) as per UKVI regulations.

For more information on the specific requirements for your country, visit **uwl.ac.uk/english-language-requirements**.

Open days

If you would like to find out more, the best way is to come to one of our open events. We hold them throughout the year, and you can get up-to-date information as well as book your place at www.uwl.ac.uk/open.

If you are not be able to make it to an event, try one of our campus tours which run throughout the year. Booking is essential, so visit **www.uwl.ac.uk/campustours**.

Meet us overseas

We regularly travel around the world and may be able to meet you in your country. For further information, e-mail the International Office at international@uwl.ac.uk.

A straightforward application process

Full-time application

All applications to study for a full-time undergraduate course are made through UCAS. You will need to apply at **www.ucas.com**

The UCAS application system allows you to apply online for full-time undergraduate courses at universities and colleges in the United Kingdom. You can apply for up to five different courses. The UCAS code for the University of West London is W05.

UCAS deadlines for home students

Applications submitted by the UCAS equal consideration deadline (ECD) are regarded as 'on-time' and given equal consideration for your chosen course and start date. Please refer to **www.ucas.com** for 2025 cycle dates. We welcome applications after that date, including applications via UCAS Extra (see page 170).

Some of our popular courses may not have vacancies after the UCAS ECD, so apply as soon as you can.

Students at a school or college registered with UCAS

All UK schools and colleges (and a small number of establishments overseas) are registered with UCAS to manage their students' applications. You should get a 'buzzword' from your tutor or careers adviser, which you will need when you register with UCAS. This confirms which organisation you are applying from and allows your referee to attach your reference.

Once you have completed your application, submit it to your referee who will send the completed application to UCAS on your behalf. You can pay for your application online either by credit or debit card, or via your school or another registered centre.

Independent applicants

If you are not at a school or college registered with UCAS, you will need to apply online independently. You will be responsible for paying the correct application fee, obtaining and attaching an academic reference, and submitting the completed application online to UCAS.

Your referee should know you well enough to write about you and your suitability for higher education. UCAS will not accept references from relatives or friends.

International applications

International students can apply direct or via UCAS.

For international students, advice is available from the British Council offices and other centres overseas, such as your school or college.

Remember to allow enough time to make your visa application and travel and accommodation arrangements. It can take longer during the summer when departments are busy.

If you experience any problems with your application through UCAS, you should contact the International Office by e-mail at international@uwl.ac.uk.

For all applicants, full instructions at **www.ucas.com** will make it as easy as possible for you to fill in your online application. There is also help text where appropriate.

If you need more information and advice, contact the UCAS Customer Experience Centre on

UK: 0371 468 0 468 Outside the UK: +44 330 3330 230

Open Monday to Friday, 8.30am – 6pm

The

=Mhat-happens-next?=

university

UCAS will send an electronic copy of your application to the University where staff consider your qualifications, personal statement and references. In the case of some courses, you may be invited to an interview or audition. We then decide whether to offer you a place on the course of your choice.

If you receive a conditional offer, your entry to the University depends on achieving the grades specified in your offer. If you receive an unconditional offer, you will have already satisfied our requirements and entry is guaranteed, subject to reply. UCAS will inform you of our decisions. Once you have received all your decisions, you must accept one as your first or 'firm' choice and one as your second or 'insurance' choice. If you are holding a conditional offer from us and your results meet the conditions of that offer, we will confirm your place as soon as we are informed of your results.

If you narrowly miss the grades stated in your offer, you may still be offered a place on your original choice, or you may be offered a place on an alternative course such as one with a Foundation Year. Admissions staff are always on hand to advise you.

What is UCAS Extra?

If you have applied through UCAS and are not holding any offers, you may be able to apply through Extra for another course. Extra allows you to apply for courses with vacancies between the end of February and the end of June. To use Extra you need to have:

- Already made five choices
- Received decisions from all these choices
- Either received no offers or declined them all.

If you decline your offers and add an Extra choice, you will not be able to accept any of your original choices later.

What is Clearing?

Clearing is a service which is available between July and September each year. It is an additional opportunity for applicants to apply for a university course if they have not already been accepted on one. There are many reasons why you might find yourself eligible to use Clearing:

- You may have been offered a place at university but didn't get the grades you needed to be accepted; or
- Perhaps you have rejected any offers you did receive because you changed your mind about the course or location you want to study; or

 You may already have your exam results, but have not applied for a course place yet.

Whatever your situation, Clearing is an opportunity for you to find the right course and the right university to suit you.

Course vacancies in Clearing are published on our website from July until late September at: www.uwl.ac.uk/clearing.

Our hotline number, which opens in July each year, is 0800 036 8888.

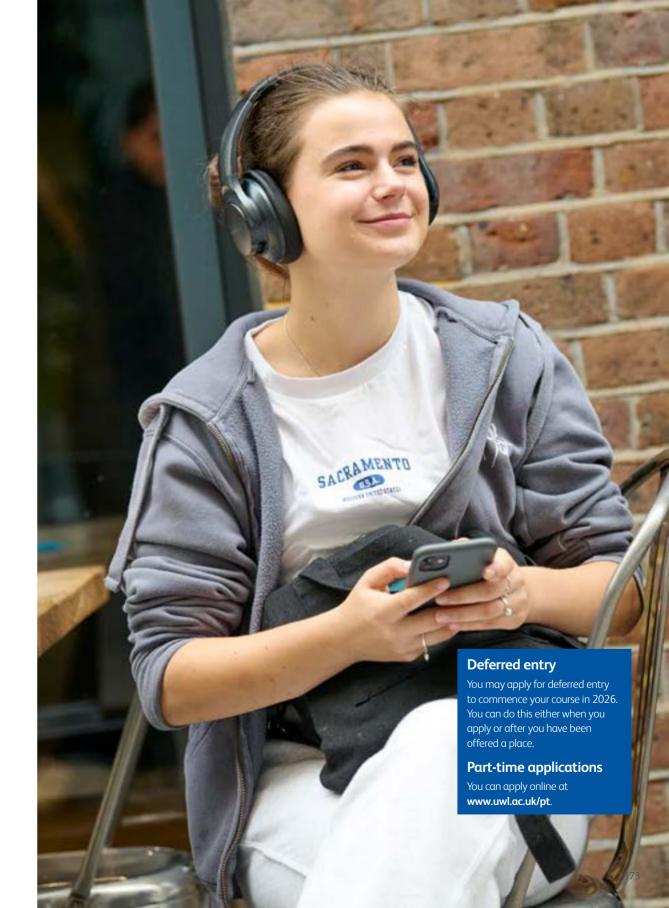

Sponsored applications

We welcome applications from students who are sponsored. In such cases, we will need a signed letter of authorisation from your sponsor stating:

- Your full name
- The course which your sponsor is prepared to pay for
- Your sponsor's name and address (for invoice purposes).

If you are employed and intending to study with us with the sponsorship of your employer, you should also apply through UCAS.

International students with an official financial sponsor will need to provide certain documentation for their visa application.

To study with us, you will need to meet our general entry requirements (including English language requirements, see page 169), as well as your course's specific requirements.

-Entry requirements = and what the symbols mean

Points are required. See page 164 for more information.

Portfolio

You must provide a portfolio which showcases your work. See page 165 for more information.

Interview

There could be an interview as part of your application process. See page 165 for more information.

S Audition

You may be invited to an audition as part of your interview process. See page 165 for more information.

Nursing and Midwifery selection day

You will need to attend an interview which may take place on campus or virtually. You must have a current satisfactory Disclosure and Barring Service check (DBS), occupational health check and satisfactory references.

GCSE GCS

You are required to have GCSE English and Mathematics at Grade 4 (Grade C if awarded prior to 2017) or above.

Pre-registration Midwifery applicants must have 5 GCSEs at Grade 4/C or above including Maths, English and a Science subject.

Additional or specific entry requirements

Specific requirements apply or additional entry routes are offered. Please check the course page on our website for full details.

Nursing Portfolio

You will need to complete a portfolio for Evidencing Graduate and Transferable Skills, which is required for entry and be able to evidence 500 hours of formal 'hands on' healthcare experience, signed off by a registrant.

Your fee status is assessed at the beginning of your course and this determines the rate of tuition fee you have to pay. To be eligible for 'Home' fee status, you must meet certain residency criteria. This criteria is broadly the same as the eligibility requirements for receiving student support funding as a 'Home' student. Please refer to our tuition fee policy on our website for more information – www.uwl.ac.uk/tuitionfeepolicy or read the detailed information on the UKCISA (UK Council for International Student Affairs) website at www.ukcisa.org.uk.

Tuition fee loans for 'Home' students

In general, most students do not have to pay their tuition fees up front. If you do not have the money to pay your fees, you can choose to take out a tuition fee loan from Student Finance England: www.gov.uk/studentfinance to cover them – this will be paid to the University on your behalf, and you will have to pay it back once you have graduated or left the University and are earning over £25,000 a year. The interest rate is kept in line with inflation. Any loan that remains outstanding after 30 years from when you leave your course will be written off. There is no age limit for the tuition fee loan.

The loan is not means-tested, and is available to 'Home' students studying in England at undergraduate level for the first time. For more information visit **www.gov.uk/studentfinance**. There are alternative arrangements in place for students from Scotland, Wales and Northern Ireland.

Fees for 'Home' students

For up-to-date information on the fees payable for a full-time undergraduate course or to find out about additional costs for specific courses, please visit www.uwl.ac.uk/fees.

You can find individual prices for all courses by searching for specific courses on our website.

Overseas Student Fees and Deposit Refunds

All full-time international students will be required to make an up-front payment of their tuition fees to secure their place on the course and to be issued a Confirmation of Acceptance (CAS). The amount of the up-front payment will be detailed in the offer letter. The terms and conditions for deposit refunds can be found on our website at www.uwl.ac.uk/international/feesand-funding.

Early payment discount

You will be entitled to a discount if you pay your tuition fees in full at or before enrolment.

If the duration of your course is less than one academic year, you will be required to make full payment of fees on enrolment.

Additional study costs

Some courses incur additional course related costs, for example, field trips, specialised materials and/or equipment. Please see the course listings on our website for further information.

Sponsored students

Fees payable by a sponsor must be paid in full before or at enrolment.

Placement year

For courses where a placement year forms an integral part of the course, you will need to make a payment for that academic year.

₩e're here to help= with extra finance

Discounts and exemptions

You should check if you are entitled to discounts/exemptions on Council Tax, NHS charges, and other costs such as travel and entertainment. These discounts/exemptions are not usually automatic. Contact Student Services for information on how to apply:

Trusts and charities

Your local library may also hold directories with details of funding available from trusts and charities that offer awards for educational purposes.

There is also information on our website: **www.uwl.ac.uk/funding**.

State benefits/tax credits

Students who are currently in receipt of benefits should be aware that studying on a full-time course could mean they are no longer eligible to continue claiming. Certain full-time students are eliaible to continue claimina some state benefits while studying, but their entitlement to student funding can affect the amount of benefit they receive. This will be the case even if a student is entitled to a student loan but chooses not to take it/all of it. It can also affect benefits that a student's partner might receive.

Students who receive benefits because of sickness/reduced capacity for work, disability or caring responsibilities may also find that these are affected.

You have a duty to inform the benefits authorities of any relevant change in your circumstances (such as becoming a full-time student and being entitled to student funding). The rules about whether you can claim, and how much you can get, are very complex. You are advised to check what might happen to your benefits, and to discuss your options, before you start a course. For more detailed information about funding, and the financial issues that may affect you during your studies, please contact the Student Advisers or see their range of information sheets at www.uwl.ac.uk/funding.

Hardship funds

'Home' students in financial difficulty may be able to apply for assistance from a University Fund.

This Fund is intended to help with living costs and is awarded at the discretion of the University.

If you are eligible for a student loan, you must have taken out the maximum amount you are entitled to before an application to the Fund can be considered.

The Student Support Fund provides financial assistance to help students who:

- Need additional financial support to meet certain costs not covered by statutory funding
- Meet unexpected financial emergencies

 May otherwise have to leave university as a result of financial difficulties.

All applications are treated confidentially and any award made is usually in the form of a non-repayable grant.

Free books scheme

As part of the Aspire Bursary, eligible full-time students receive free books to the value of £100 for full-time students and £50 for part-time students in their first year of study. These texts have been chosen by your course team as the core books you will need. In the majority of cases these books are e-books. As part of the bursary, your course team may decide to provide you with equipment rather than books. Access to the free books will be provided during the induction process. For more information visit: www.uwl.ac.uk/uwl-aspire-bursary.

Aspire Card

As part of the Aspire Scheme all eligible undergraduate full-time students will receive £200 over the course of their studies (£50 per year for part-time students up to a total maximum amount of £250). You can spend these funds at the JS Group's online store to purchase books and other resources to support your studies. For more information visit: www.uwl.ac.uk/uwl-aspire-bursary.

Where to apply for financial support

Students who live in England

Tel: 0300 100 0607 www.gov.uk/apply-onlinefor-student-finance

The

=[m-going-places=

university

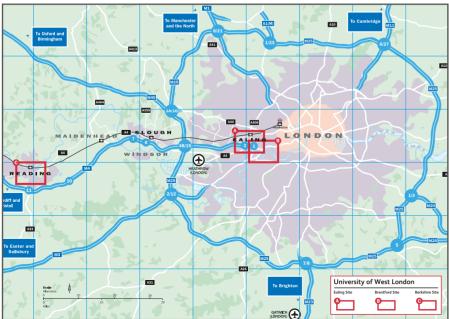

A vibrant London location, with travel links to everywhere

Based in popular west London, we are in the heart of one of the UK's most successful business regions, with a number of global organisations, such as GlaxoSmithKline and Sky, based locally. Both Ealing and Brentford are vibrant and multicultural, combining a cosmopolitan atmosphere with spacious parks and relaxed café culture.

The region is brilliant for transport. Our west London campus is close to both Heathrow Airport and central London, served by fast rail links and great local bus services. We run a free shuttle bus between Ealing Broadway and South Ealing stations as well as our Ealing and Brentford sites.

Our Reading site is walking distance from the main railway and bus stations, next door to car parking and within easy reach of the town's 'park and ride' bus stops. People come from miles around for the shopping and night life

Our two west London campuses

Directions

Ealing campus

St Mary's Road, Ealing, London W5 5RF

Our Ealing campus is just 30 minutes on the Underground from central London or 10 minutes by fast train from Paddington. It is also 20 minutes from London Heathrow International Airport. Ealing has fast rail links from Reading and London, great local bus services, and it is easy to get to and from all London Underground stations.

By bus

The nearest bus routes to the site are the 65, E2, E8, 207, 427, 607, E3 and E9.

By Underground

The closest Underground stations are South Ealing on the Piccadilly Line (10 minute walk) and Ealing Broadway which currently services the Central and District Lines (15 minute walk). The Elizabeth Line has also partially opened at Ealing Broadway with Ealing now being 42 minutes away from Reading, and once the line is fully open, 24 minutes from Liverpool Street.

By train

Ealing Broadway also has regular train services to and from London Paddington (10 minutes), Slough (25 minutes) and Reading (50 minutes).

By road

The Ealing site lies on the B455 between the A4 and the A4020, Uxbridge Road. The M4 motorway is a few minutes' drive away from Ealing (Junction 2), and the A40, M40 and M25 are all easily accessible.

Brentford campus

Boston Manor Road, Brentford, Middlesex TW8 9GA

Our Brentford site is 1.5 miles south of the Ealing site. There are great bus and rail services nearby giving quick and easy access to central London. In addition, the free shuttle bus runs to and from both sites, and local tube stations.

By bus

The bus routes closest to the Brentford site are the 65, E2, E8 and H91.

By Underground

The nearest Underground station is Boston Manor on the Piccadilly Line (15 minute walk).

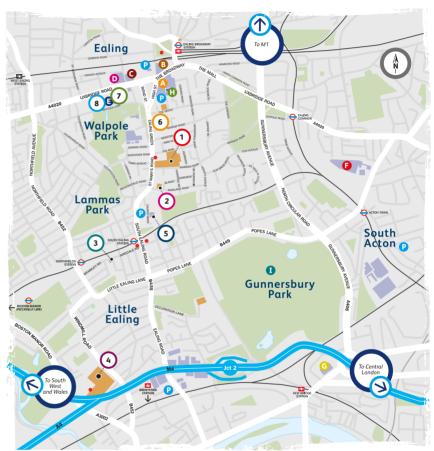

By train

Brentford mainline train station is a five minute walk from the Brentford site with scheduled trains into central London arriving at Waterloo station.

By road

The Brentford site is on the A3002, Boston Manor Road which is just off of the A4, Great West Road.

185

Reading

Reading Campus Berkshire Institute for Health, Fountain House, 2 Queens Walk, Reading RG1 7QF

By bus

The local bus routes include the 15, 16, 17, 19, 20, 20a and 21.

By train

The Berkshire Institute for Health is within walking distance of Reading train station. From here, Great Western Railway offers good connections to both London and the South. London Paddington to Reading is less than 30 minutes.

By road

The campus is in Reading town centre, just off the A329 ring road, and there's parking nearby at Broad Street Mall. The M4 (Junctions 10 and 11) is just a few minutes' drive away and the M40 and M3 are both within easy reach.

Some important information

This Undergraduate Prospectus is intended as a general guide for prospective undergraduate students.

The University has made every reasonable effort to ensure the information provided in this Undergraduate Prospectus, is accurate at the time of publication. The University however does not represent or warrant that the information provided is accurate, complete or current.

We recommend that you contact the University to check the current position on courses and services.

The University aims to provide the courses, University services and facilities described in this Undergraduate Prospectus. However, courses, University services and content of publications remain subject to change. Changes to courses and University services may be necessary in order to comply with the requirements of accrediting

bodies, to keep courses current through updating best practices or areas of study, to improve the quality of educational services, or in response to student feedback.

Circumstances may also arise outside the reasonable control of the University leading to required changes. Such circumstances include unexpected student numbers or lack of demand, significant staff illness (where a course is reliant upon a person's expertise), unexpected lack of funding, severe weather, natural disaster, epidemic or pandemic, fire, civil disorder, political unrest and government restrictions making a course unsafe to deliver or changes in applicable laws.

After a student has taken up a place with the University, the University will look to give early notification of any changes and try to minimise their impact, offering suitable alternative arrangements where possible.

Up-to-date information on courses will also be provided with an offer of a place to study where required. The latest key information on courses, entry requirements and fees can be found at www.uwl.ac.uk/students/ **undergraduate**. Please check this website and/or contact the University at courses@uwl.ac.uk before making any decisions to ensure that you have the University's most up-to-date published information. For full details see the University's Terms and Conditions available here www.uwl.ac.uk/terms.
